

10 Irrigated Farms For Sale GRANADA, COLO.

Thursday, June 27, 1918, 10:00 A. M.

On account of my poor health, I am unable to give personal attention to my farm, so have decided to divide farm into smaller tracts, and will therefore sell at Auction, on the above date—Auction to be conducted on farm.

LOCATION: 2½ miles northwest of Koen, 5 miles northwest of Granada, 4 miles southwest of Bristol, 18 miles east of Lamar. 1 mile from railway station and Santa Fe Trail.

ACRES: 1235 acres divided into 10 tracts ranging in size from 80 to 240 acres. 550 acres now in alfalfa, balance cultivated except portion in timber and native grass.

IRRIGATION: Ranch has 18.96 cubic feet of water, conveyed by Graham Ditch. Water delivered by Warranty Deed. NO BONDS. Graham Ditch is supplemented by a "sump," developing as much or more water than Ditch. THIS WATER RIGHT IS A DIRECT GRAVITY FLOW.

TERMS: 10 per cent on day of sale, 40 per cent on delivery of Deed, balance to be arranged, with interest at 7 per cent.

ADDRESS 512 DENHAM BLDG., DENVER, COLO., FOR DESCRIPTIVE CIRCULAR.

BAND CONCERT

FRED L. PERDUE, 512 Denham Bldg., Denver, and
C. B. RAY, Lamar, Colorado
AUCTIONEERS.

E. E. AXLINE, Owner, Granada, Colorado

91. Reinhart Wollert, Lamar, Colorado.
92. Lloyd F. Mendenhall, Granada, Colorado.

ACID TEST WILL BE APPLIED IN THIS CAMPAIGN

Case of Representative Keating of Colorado is One in Point

Pueblo, Colorado.—The "acid test" is being applied to the sincerity of the Democratic National and Congressional Committees, and to Democratic leadership in general, in a situation which exists in this and other Congressional districts in the country represented by Democrats who have failed to measure up to the Presidential test of thorough loyalty as laid down by President Wilson and Vice President Marshall in the recent Wisconsin senatorial contest.

This, the 3rd Colorado district, is represented in the House by Edward Keating, who not only voted against tabling the McLenore resolution, as Representative Lenroot did, but publicly announced that he was in favor of passing the resolution. When questioned by the Pueblo Star-Journal as to his reasons for favoring the McLenore resolution, Mr. Keating replied that he "would never vote to send the boys to the trenches upon a technicality."

Despite his record, President Wil-

son supported Representative Keating for re-election in 1916. Keating was criticized by some Democrats of the district for his vote on the McLenore resolution, and other pacifist and socialistic tendencies. He appealed to President Wilson for vindication, and got it. Under date of October 17th, President Wilson wrote him a letter, which was used in fac-simile as an advertisement. It reads as follows:

"This is just a line to express my interest in your re-election and to hope that everything is going well with you. I am sure that your colleagues, as well as I, would feel that your absence from the House of Representatives was a real loss."

This is the same sort of letter written by President Wilson to Representative Finley Gray, of Indiana, another pacifist and near socialist, in a campaign preliminary to a special election held less than a year ago. It throws an interesting side light on the Wisconsin campaign letter against Lenroot, in which President Wilson declared that failure to vote against the McLenore resolution indicated doubtful loyalty. It may be added that Representative Lenroot never said he would support the McLenore resolution, and he did not vote on the

merits of the measure or say anything to indicate that he favored it. Representative Keating clearly declared himself for the measure.

Representative Keating's course during the present Congress is consistent with his previous record. He voted against the war resolution, against the bill to increase the military establishment, including the conscription feature, and against the espionage bill.

The question now arises as to why nothing has been done by the Democratic National and Congressional committees, or by Democratic leadership, assuming their sincerity in pushing forward what they call the "loyalty" issue, to prevent the re-nomination of Representative Keating, and other Democrats who have voted, as he has, against the essential war measures of the administration. Apparently these leaders are not only going to refrain from opposing, but are actually going to support, Congressmen who have voted against war measures, providing they are Democrats. While doing this they are planning to use the rallying cry: "Stand by the President," part of the program of standing by him being to re-nominate and re-elect men like Keat-

ing, who have failed to vote for the most essential war measures.

It is true that war is being waged by administration leaders against Senator Hardwick, of Georgia. The real complaint against Senator Hardwick, however, is not about his record in voting for war measures, but because he has taken such a decided stand against socialism and against extensions of executive authority he did not believe were connected with war powers. Men like Mr. Keating apparently can go as far as they like in fighting war measures, providing they are entirely loyal from a party caucus standpoint.

It is evident that the "acid test" matter is going to cause some stir in the present campaign. If, as now seems certain, Democratic leaders support men like Representative Keating for re-election, upon such a record as he has made on this paramount issue of "loyalty," they are going to be confronted with this evidence of their misuse of the "issue" of patriotism for personal and partisan purposes. "Patriotism" was the word used to describe this by Republicans in the Wisconsin campaign. A word of protest from Washington against Representative Keating's votes would eliminate him politically. But it doesn't come and no one here believes it will come.

Advertising Colorado.

Reports from all sections of the state indicate that crops in Colorado will be exceptionally good this year. The state board of immigration desires to be in position to prepare a number of first class exhibits of Colorado agricultural products of this year's crop for display purposes, asking them to aid in getting such exhibits together. It is possible that the board will make displays of state products at one or more of the large national agricultural shows this year, and the immigration commissioner desires to be prepared to give every section of the state good representation. Full cooperation on the part of the local communities will be necessary to enable the state to make a showing that will do justice to all sections.

The state board of immigration has just completed a survey of the commercial bodies in the state, with a view to cooperating more closely with these organizations in bringing new settlers and investors to Colorado. All commercial bodies that have not sent reports to the board are urged to do so, giving the names and officers of their organizations.
