PARIS MIGHT CANCEL HOLIDAY ON SATURDAY

By Wilfrid Fleisher, (United Press Staff Correspondent) Paris, Jan. 14.—It is proposed to upset the traditional progress of the Paris working week by annulling the Saturday afternoon holiday. This measure is being contemplated as a substitute for a reduction in wages in the larger wholesale organizations and notably in the dressmaking establishments.

At present, Paris goes on a holiday at noon on Saturday and remains "en fete" until Monday morning. The thousands of "Midiennes" who work

in the dressmaking establishments of the rue de la Paix swarm onto the boulevards when the noon whistle blows on Saturday and fill the cafes until the early hours of Sunday morning. It is expected that the proposed regulation will meet with considerable opposition from the younger element. Economic experts are of opinion that the rehabilitation of the country depends on increased production and this is one of the means which they have suggested to meet the situation. German industry is going full speed ahead, and if France is to maintain her position in commerce she must be prepared to meet the competition.

DISCOVERY MAY PROVE BOON TO BETTER RUBBER

(By United Press) Pittsburgh, Jan. 14.—The Mellon Institute here is seeking to extend the uses of magnesia, and one of its discoveries may prove a boon to the rubber industry.

H. W. Greider, specializing in magnesia products, declared that when used in suitable proportion, magnesium carbonate greatly increased the strength of compound rubber. "In addition to making it tougher and less flexible, carbonate of magnesia increases the total energy of the resilience of rubber," he said. "Experimental work has shown that the addition of twenty parts of magnesia

um conate to 100 parts rubber will increase the resilient energy about 50 per cent, and produce a corresponding increase in resistance to wear."
