## PARTY OF FOUR WAS "MESS"

Term Used Most Frequently in the Army and Navy Has Changed Slightly in Meaning.

Originally the term "mess," as applied to persons who are in the habit of eating their meals together, and thus particularly of the parties into which a ship's company or an army regiment are divided, was a group of four persons sitting at one table and helped from the same dishes. In the Inns of Court, London, the original number is preserved, four benches or four students dining together.

In the navy it is usually convenient to have a captain's mess, another for the warrant officers, another for the messengers, etc. The men's mess for the sailors or marines is styled the "general mess," but this is generally divided into sections, as a matter of convenience. It has become common to employ ammunition passers as mess attendants.

In early times the word "mess" was applied to food of a more or less liquid character, as soup, porridge, broth, etc. It is probably in allusion to the sloppy nature of semi-liquid messes of food that a mess has come also to mean a state of disorder, confusion and discomfort. Skat takes the word to be a variant of "mash," originally to mix up.

Mrs. Tanberg of Cass Lake was the guest of Mrs. Henry Carter in Bemidji last week.

Rev. Wm. Elliott of the local Episcopal church, left this morning for Minneapolis to spend a few days with his family there.

Don't forget the Chicken Pie Supper at the Presbyterian church Wednesday, Oct. 25. 5c. 2:10 24

## Iron In Antiquity.

An eminent scientist recently summed up some interesting facts about the use of iron by the ancients. Interesting in the light of metallurgical practice is a part of an iron tool found in the Great Pyramid, because it contains not only nickel, but also combined carbon, showing that it is not of meteoric origin. Under a sphinx at Karnak an iron sickle was found. At Delhi there still exists an iron pillar, 50 feet high and 10 inches in diameter, made up of 50-pound blooms welded together. This pillar, it is suggested, may be regarded as the dozen among products of the heavy iron industry. The use of iron and steel in China has been traced to the year 2357 B. C. The Japanese are said to have had a curious method of making steel. They buried forged iron in marshy ground, and after eight or ten years, through some alchemy of nature, it came out steel.

## Put Out Your Tongue.

The latest science, "called glosomania," purports to read the person's character by the size and shape of the tongue. According to glosomanists, those who possess short and broad tongues are apt to be untruthful, while people whose tongues are short and narrow are sly and bad-tempered. When the tongue is long and broad, it is a sign that its owner is inclined to be a gossip. A tongue that is long and narrow denotes a frank, open disposition. Girls with small, round, plump tongues possess trustful and affectionate dispositions; but men with similar shaped tongues are apt to be inconsistent. What glosomanists term the rectangular type of tongue—one that is almost square in shape—is indicative of a strong, virile nature. Men with these shaped tongues are ambitious, active, and likely to get on in the world. Square-tongued women, however, are likely to be self-assertive.

## EXPERT WATCH REPAIRING

W. H. HUESGEN JEWELER

MARKHAM Hotel Building

The riddle of Baikal, in Central Asia is similar to that of Lake Tanganyika, in Central Africa. In both cases a large body of fresh water remote from the ocean contains organisms apparently marine. Both lakes, again, contain a very large number of species not found elsewhere. Lake Baikal contains a few mollusca of apparently marine forms. One of the most remarkable features of the lake perhaps is that, although it is frozen over for about five months in the year, the animal life is extremely abundant and varied. This may be partly accounted for by the existence of hot springs.

Got the Toll-keeper's Goat.  
A Dutchman riding a little cart drawn by a goat was stopped at the bridge by the toll-keeper.  
"I got to pay toll," said Hans.  
"Yes; five cents to cross the bridge."  
After an argument he paid the toll and went back again, only this time he had the goat sitting in the cart and he was drawing it himself. Out came the toll-keeper. "Here, you know you've got to pay five cents."  
The Dutchman shook his head and pointed to the goat, said, "Don't talk to me—ask the driver!"—Boston Transcript.
