The Largest Operators in Rio
Grande Valley Lands in the
United States

The conditions that make the Rio Grande Valley the peer of all other land projects are its richness of soil, its irrigation canals, its cheap hired labor and last, but not least, its unmatched climate.

Land that can be irrigated is limited and that in the Rio Grande Valley is only a little strip, about fifteen miles wide and seventy long.

Basing the valuation of this land upon its production, its geographical position and its climatic conditions, we predict it will be the highest priced of any land in the United States.

We make strong statements about this Valley, but we can show you.

We run excursions on the first and third Tuesdays of each month from leading points all over the North, which take prospectors right to see what the Valley offers.
