THETHER it be evolution or revolution, we do not know, but the fashions of yesteryear seem to be descending on us in increasing numbers. Designers are finding a mine of inspiration in phases of various modes of the past. The Empire, Directoire, Victorian, and even the ancient Grecian eras have been studied, and various details of the costumes extant during those periods have been cleverly utilized and blended with the ultra-modernity of the current mode with a touch of incongruity. And so we see, off-the-shoulder decolletages, ruched hemlines, dolman capes and wraps, Greek draperies, princess gowns and other fashions featured in the dress parade, and all of them are charming and lend a refreshing variety to

We have had sketched for you to-day several new trifles. Among them you will find two fashions reminiscent of other days. The first is the shoulder cape which in this case is of black broadtail, and we feel sure that this delightfully demure touch will be welcomed by many women who seek the picturesque. The second is of course the sailor hat, that style that is so inordinately becoming to the youthful and piquant type. This sailor is made of heavy straw in a weave of brown, tan and black with a blue band.

Other items include stockings of striped silk and wool, excellent for sports wear, and three exceedingly good sho models. The shoe of brown and tan calf has a strap and buckle trimming that is purely ornamental, but the broad strap on the white kid slipper performs a strictly utilitarian purpose. The oxford is in brown pin-seal and tan kid.
