John S. Wilson,

At Chambers, Manning, S. C., February 18th, 1919.4—3t-c.

TREAT COLD AND THE FLU

First Step in Treatment Is a Brisk Purgative With Calotabs, the New Nausealess Calomel.

Doctors have found by experience that no medicine for colds and influ-enza can be depended upon for full effectiveness until the fiver is made thoroughly active. That is why the first step in the treatment is the new, nauscaless Calomel called Calonew, nauscaless Calomet caned Calo-tabs, which is free from the sicken-ing, weakening, and salivating ef-fects of the old style calomel. Doc-tors also point out the fact that an active liver goes a long way towards preventing influenza and is one of the most important factors in enabling the patient to successfully withstand an attack and ward off pneumonia.

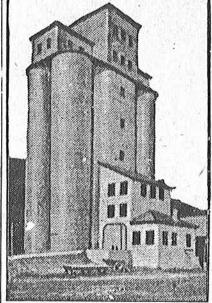

One Calotab on the tongue at bed time, with a swallow of water—that's all. No salts, no nausea nor the slightest interference with your eating, pleasure or work. Next morning your liver is active, your system is purified, and you are with a hearty appetite for breakfast. Druggists sell Calotabs only in original sealed packages, price thirty-five cents. Your money will be cheerfully refunded if you do not find them delightful.—(adv.)

ADVERTISE IN THE TIMES

MADE ORNAMENT TO TOWN

Oregon Concrete Grain Elevator "Camouflaged" Into Really Artistic-Looking Building.

Lines as pleasing as those of an oldworld castle have been incorporated into a modernly arranged and equipped grain elevator of re-enforced concrete, recently erected at Ione, Ore., at a cost of approximately \$40,000. metry has been obtained by arranging two circular and two semicircular storage tanks either side of a central rectangular structure and by topping the whole with a pleasing cupola. A heavy black cornice contrasts sharply with the white finish of the walls. The ground dimensions are 62 by 33% feet, and its height is 124 feet over all. It contains a total of 20 bins with a capacity of 100,000 bushels. A speclal feature is the arrangement of these bins so as to allow an unob-

New 100,000-Bushel Grain Elevator at ione, Ore., Which Is Distinctive on Account of Its Unusually Artistic Exterior, Its Conveniently Arranged Interior and Its Up-to-Date Equip-

structed floor space of 12 by 33 feet on the same level as the car floors. The construction is such that the weight of the overhanging bins is transferred to points of contact in the solid slab of concrete beneath the building.-Popular Science Magazine.

WASHINGTON AS MODEL CITY

Chicago Newspaper Points to National Capital as an Example Worthy of Being Followed.

It is strange that American cities have been so slow to appreciate the value of a plan as it is exemplified at the national capital, remarks the Chicago Tribune. The city of Washington was planned by the best landscape architect the founders of the republic could call to their aid. The beauty, spaciousness and facilities of the city with its great open circles and radiating streets, affording varied sites for residences and commanding locations for public and commercial buildings, impress every visitor and justify the pride of every citizen in the capital of his country. But Chicago's plan, even though it involves the reconstruction of its planless areas, is still greater, because it provides a water front that any city in the world could envy, and because it comprehends all parts of the city and starts the people of every section on further plans to improve and beautify their home surroundings.

Importance of City Planning.

As the best humanitarians hold that man builds upon the basis of character, so it is that cities in their physical planning, as it affects their surroundings, must provide for the finer things that tend to make the mind as well as the body rich. The city plan, in view of these conditions, becomes one of the most important and farreaching influences of the times.

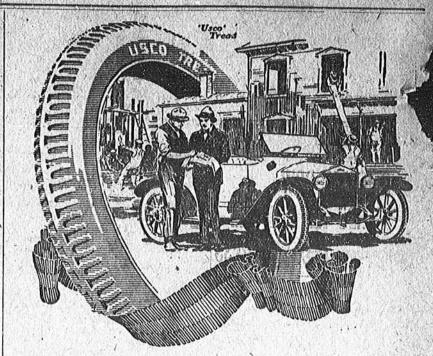

What is done now for the future must be done right!

Compared Ghent to Venice.

Ghent was approached in 1641 by John Evelyn, driving along the Brus sels road in a coach and six with which Sir Henry de Vic, the English agent, had accommodated him. He had traveled to Ghent "to meet my Lord of Arundel, Earl Marshal of England," and he compares Ghent to Venice because "the Lys and the Scheldt meeting in this vast city, divide it into 26 Islands, which are uni-ted by many bridges." The population of the British in the old Flemish city recalls the time, many centuries ago, when Ghent, under the van Arteveldes, was the powerful ally of Edward III. Evelyn mentions having seen a palace of Plantagenet memories.

So Are Scouts.

American soldiers are clean, the quartermaster's department in the last half year having bought for the A. E.

The More You Use Your Car The More You Need Good Tires

Your car's usefulness is increasing every day.

It is becoming more and more of a real necessity to you—both in your business and home life.

For that very reason you need good tires, now, more than ever.

The out-and-out dependability that created so tremendous a demand for United States Tires in times of war is just as desirable today.

It reduces tire troubles to the vanishing pointmultiplying the usefulness of your car and putting the cost of operation on a real thrift basis.

United States 'Nobby', 'Chain', 'Usco', and 'Plain' are the most popular fabric tires built. They have all the strength and stamina our years of experience have taught us to put into tires.

There is also the United States 'Royal Cord', the finest can built for passenger car use.

Our nearest Sales and Service Depot dealer has exactly the treads you need for your car and the roads you travel.

He will gladly help you pick them out.
