Wonderful Results from Hot Air Experiments in Philadelphia. Remarkable results have been obtained from a new method of treating rheumatic affections which has just been tried in this city before the coun-873 06 ty medical society.

The method consists in the local ap plicaton of hot air to the parts affected. The apparatus by which this is accomplished consists of a copper cylinder. under which several gas jets are kep burning. Into this cylinder the limit Deducting from the above total of Stop-cocks are arranged to let out \$21,729.78 the amount of warrants moisture exuding from the skin, and drawn on artesian water fund of \$2,- the temperature is raised to 250 to 260 302 77 leaves a balance of \$19,426.91 degrees. Precautions are taken to prevent the limb from coming in contact wth the hot metal, and the application

is continued for fully 40 minutes. Two patients were brought in for the experiment. One was a man who had 419 39 been under the care of a physician, who 385 00 was present, for several months, and 54 89 had been gradually growing worse, 3,241 67 He was unable to move his toes or his ankle, and any motion of the limb caused excruciating pain. At the end of 40 minutes, during which time his temperature was raised nearly two degrees, as shown by the mouth thermometer, and his pulse increased about 14 75 15 beats per minute, the limb was taken 79 30 out of the exlinder; the patient moved 506 66 his toes as freely as does a child, bent his ankie without difficulty and walker with ease, feeling no pain. Other rheumatic pains in other portions of

the body had also disappeared. The second patient was a negro who 871 37 lumbage, and who uttered many greans 2,302 77 as he was being placed on an apparatu subjected to the heat for 40 minutes and when told to rise he sat up as read City Treasurer Fassett then offered Hy as when in perfect health.
