## REPUBLICAN CITY TICKET.

FOR MAYOR  
JOHN O'KEEFE  
FOR ALDERMAN FIRST WARD  
E. C. SCOTT  
FOR ALDERMAN SECOND WARD  
W. H. LONG  
FOR ALDERMAN THIRD WARD  
E. F. J. MCCARTHY  
FOR ALDERMAN FOURTH WARD  
SCOTT C. WHITE

O'KEEFE and progression.

MAGOFFIN and retrogression.

MAGOFFIN means a deal.

O'KEEFE means a deal.

THE "kurnel's" juggernaut car was  
side-tracked yesterday.

O'KEEFE should command every  
Republican vote and draw heavily from  
the independent democrats.

YESTERDAY was one of the days  
when the "kurnel" did not run over  
the fellows in the middle of the road.

SCOTT, LONG, MCCARTHY and WHITE  
are all good men. The republican  
ticket should be elected by a hundred  
majority.

WITH the close alliances of O'Keefe  
to the ring as an employee of its organ  
he has worn no collar in his position as  
alderman.

It is now said that none of the bills  
introduced in congress to modify the  
civil service law will be considered at  
the extra session.

THE red sunsets over the western states  
of the great American union are  
ascribed to the blushing of Heaven for  
Nevada, says the Mex. Herald.

The republican party has put up a  
set of progressive men for office. This  
party was never so united before, and  
its ticket will be elected by a handsome  
majority.

THE nominee of the republicans for  
mayor is a young man, but he is ener-  
getic and ambitious and if elected will  
utilize his energy in giving El Paso a  
first class administration.

"COLONEL" Campbell states that not-  
withstanding his disappointment on  
yesterday that he will follow the ex-  
ample of other good republicans and  
be found in the front ranks fighting for  
O'Keefe and progression.

In the nomination of John O'Keefe  
for mayor we believe it is the first time  
the first ward has ever been so honor-  
ed. In consequence it is expected that  
the first ward will do its candidate  
proud by rolling up for him a handsome  
majority.

EVEN Alderman Kachler, who so  
much desired to favor the mayor and  
his delegation, could not help but ad-  
mit the justice of the claims of the  
opposition delegation, signing the ma-  
jority report instead of bringing in a  
minority report as Col. Campbell  
wished.

CAPTAIN BEALL, after having all the  
honors possible thrust upon him by the  
late democratic city convention, includ-  
ing the chairmanship of the Central  
committee should feel highly  
honored at being called in by the lead-  
er of one of the contesting delegations  
in the fourth ward republican middle  
yesterday.

THE Massachusetts legislature de-  
fated the measure to provide means  
for the erection of a statue to General  
B. F. Butler. The bill seemed in a  
fair way to pass until a member arose  
and asked: "If a statue were erected,  
what battles would be inscribed on its  
pedestal?" Whereupon the bill was  
voted down by 91 to 38.

THE exact scope of the supreme  
court's anti-pooling decision will not  
be known until the full decision is care-  
fully studied. It will probably be  
found that the anti-trust law of 1890  
can be made to hit all sorts of "com-  
bines" as well as those in transportation.  
There is a popular revolt against  
trusts and this would be a good time to  
attack them in the courts. Public opin-  
ion has more effect in determining in-  
terpretations of law than is ordinarily  
supposed.

THE New York Herald correspondent  
in Cuba, who was evidently sent over  
there at the expense of that great  
journal (and not at that of the Cuban  
Junta in this country) to gather facts,  
has been spending some time with re-  
bel guerrilla bands in the brush, recent-  
ly wrote a letter to his paper "from the  
field, near Sancti Spiritus," in which  
he gave some inside facts about the  
conduct of the Cubans in the field. He  
says the rebels are more bushwackers  
and skulkers, and that instead of the  
armed forces attacking the Spaniards  
while the latter are scouring the  
woods for families of refugees and pa-  
cificos, the armed forces themselves  
take to the brush to hide, and that the  
whole object of the Cuban leaders  
seems to be to avoid battle and con-  
sequent danger and await the interven-  
tion of the United States. He accuses  
the leaders not only of inactivity, but  
"frequent downright cowardice," and  
adds that instead of their treating  
Spanish prisoners with invariable  
kindness, as they claim, he "learned  
from Captain Smith, of Gomez body  
guard, that more than half of the  
Spaniards captured at Guimarara were  
killed after the surrender, on one trifling  
pretext or another, while being  
conveyed to Santiago where they were  
to be employed in planting grain and  
vegetables for the insurgent armies."

NEAR Mobile, Ala., last year a party  
of men mobbed an offender, and soon  
afterward several of the lynchers were  
arrested. One of the number turned  
states evidence and several of his co-  
wards were sent to the penitentiary,  
though four of the lynchers skipped  
the country. Recently the informer  
was assassinated in Mississippi, near  
the Alabama line, and now the gov-  
ernor of the last named state has offered  
a reward of \$200 each for the four  
missing assassins, who are wanted for  
trial for the mob murder, and who are  
believed to have assassinated the in-  
former.

If the United States senate is to be  
agitated by resolutions, taking cogniz-  
ance of every sensational newspaper  
report, that body might as well abandon  
all useful legislation and adjourn to the  
New York World office—send for  
Pulitzer and papers.

THE lands already more or less  
flooded by the breaking of levees and  
the overflow of the Mississippi, aggre-  
gate 14,300 square miles, a territory  
larger than the conjoined states of  
Maryland and Delaware.

BOTH houses of the Texas legislature  
have passed a bill appropriating \$25,000  
to purchase the San Jacinto battle  
ground and improve it for a state park,  
and it is believed the governor will  
sign it.

It is asserted that one of the states-  
men elected in Austria favors the aboli-  
tion of the Christian religion and a  
return to the worship of the ancient  
Teutonic deities.

THE New York Sun says that the  
greatest ten Americans are Washing-  
ton, Franklin, Jefferson, Monroe, Co-  
oper, Lincoln, Grant, Seward, Fulton and  
Morse.

## He Laughs Best Who Laughs Last.

The New York Journal is crowing  
lustily over its fading, contemporary  
the New York World. The latter was  
boasting mightily and vaunting its  
own uprightness over the prospect of  
the Journal's being shut out of the  
news service through the device of the  
United Press. But lo and behold,  
as Joe Pulitzer was tooting his old bazoo  
over the prospective death of his  
great rival, the Journal steps in and  
buys out the Commercial Advertiser,  
which is a member of the Associated  
Press. Then Humpty Dumpty Pulitzer  
gave a wild whoop of despair, and he  
fell off the wall, and all the king's  
horses and all the king's men cannot  
put Humpty Dumpty together again.  
Such is life in the far and effects east.

A medical journal has made some  
careful investigations among the col-  
leges of New England, which enable it  
to state that students who do not use  
tobacco gain weight, height and girth  
of chest from 10 to 24 per cent, faster  
than those who chew or smoke. The  
development of the lungs if this as-  
sertion is correct, is especially retarded  
by the tobacco habit.

Not a single volume of "Oliver Op-  
tic's" works is to be found on the  
shelves of the Boston public library.  
They were excluded seven years ago at  
the suggestion of S. A. B. Abbott, then  
president of the board of trustees. Mr.  
Abbott argued that the books were  
"trashy" and of so juvenile a nature as  
to be unworthy a place on the shelves  
of the library.

New York capitalists assert that the  
new tariff will cause the investment of  
their money in beef canning establish-  
ments in Mexico, to put up beef for the  
European market. If that is what they  
want they can make more by going to  
Oregon and canning hoppers.

The republicans of New Mexico are  
to a man in favor of Col. P. Mothersill,  
of Engle, Socorro county, for the posi-  
tion of collector of the port of El Paso.  
—Citizen.

What active people need is a natural  
laxative like Dr. Pierce's Pleasant Pel-  
lets which are powerful without being  
violent. They move the bowels gradu-  
ally and comfortably but surely. You  
can regulate the dose—one, two or  
three "Pellets"—exactly as you need.  
They strengthen the intestines to do  
their own work, so that after their  
movements have become regular they  
keep on naturally of themselves.

During the winter of 1893, F. M.  
Martin, of Long Beach, West Va., con-  
tracted a severe cold which left him  
with a cough. In speaking of how he  
cured it he says: "I used several kinds  
of cough syrup but found no relief  
until I bought a bottle of Cham-  
berlain's Cough Remedy, which relieved  
me almost instantly, and in a short  
time brought about a complete cure."  
"I was troubled with a cough or cold  
and used this remedy and you will find it  
necessary to try several kinds before  
you get relief. It has been in the  
market for over twenty years and  
constantly grown in favor and popular-  
ity." For sale at 25 and 50 cents per  
bottle by all druggists.

Diaz's Message.  
In the course of his message to the  
Mexican congress recently assembled  
President Diaz remarks that the two  
governments have agreed to submit to  
the arbitration of the Argentine min-  
ister at Madrid the claims against Mex-  
ico of Charles Oberlander and Barbara  
M. Messenger, growing out of an arrest  
of the former by Mexican officials on  
the border of lower California. The  
arrangements for arbitration of this  
claim have been reached under the old  
treaty of Guadalupe, which provided  
for the submission to arbitration of all  
controversies between the two nations  
which can not be settled through dip-  
lomatic channels, provided that arbi-  
tration is not applicable to special cir-  
cumstances, which do not exist in the  
present instance.

In dealing with domestic affairs, the  
president alludes to the progress of  
public works through out the country  
and devotes much space to the subject  
of education.  
Gold and silver mining continue to  
prosper. The census taken by his  
previous message in September, two  
thousand and fifty-three mining grants  
have been issued. During the last  
fiscal year the total exports of Mexico  
amounted to \$105,000,000, of which  
mineral products contributed \$71,000,000.  
In some of the mining camps of  
Mexico, great progress is being made  
in the application of electricity for the  
operation of water power for the opera-  
tion of mining and milling machinery.  
The Mexican government has ac-  
cepted the invitation to be represented  
by delegates to the universal postal  
congress to meet in Washington in May.

The railway system of the country  
has been extended since September by  
485 kilometers. Twenty-two new or  
modified charters for railroads have  
been granted in the same time, and  
only four have been forfeited.  
The financial condition of the govern-  
ment continues entirely satisfactory.  
The four per cent bonds are selling at  
102 1/2. In the first half of the  
presidential fiscal year, the normal  
revenue amounted to \$25,500,000, which  
is more than half of the sum adopted as  
the basis for estimating the revenue  
during the next fiscal year. Imports  
exceeded collections in the first  
half of the last fiscal year by half a  
million and the yield of stamp duties  
by nearly one million.

## Providing Against Dryness.

F. E. Roessler has an article in the  
Dallas News on "What Can Be Accom-  
plished by Irrigation." Irrigation is  
more directly to the state of Texas,  
and is put forth to incite the citizens  
of that commonwealth to activity in  
the construction of irrigation work-  
ing and providing their lands with a com-  
plete system for the application of  
moisture. As an introductory, Mr.  
Roessler says:

"The quantity and quality of products  
obtained per acre on irrigated lands is  
almost beyond belief to those unac-  
quainted with the fact that a given quantity  
of fertilizing water is absolutely neces-  
sary to produce a given quantity of  
grain or other product. In all arid  
regions, the farmer by practical expe-  
rience has acquired this knowledge and  
for the time, being his own rainmaker,  
he can with reasonable certainty esti-  
mate beforehand how large his crop  
will be. As he irrigates solely because  
there is insufficient rainfall, he is sel-  
dom liable to have his crops damaged  
by excessive rains, and in consequence  
he generally produces a better article  
than his colleague who depends exclu-  
sively on the rainfall for watering a  
crop. The farmer in the arid region  
takes every risk. His crop is not  
liable to be killed, and he does not  
meet with the losses which his col-  
league meets with by turning on the  
water from the ditch. The growth and  
prosperity of the arid west is limited  
only by the quantity of water available  
for agricultural purposes."

## In Love With His Mother.

Of all the love affairs in the world,  
none can surpass the love of a boy for  
his mother. It is pure and noble  
and honorable in the highest degree to  
both. We do not mean a mere dutiful  
affection. We mean a love that makes  
a boy gallant and courteous to his  
mother, saying to everybody plainly  
that he is in love with her. Next to the  
love of a husband, nothing crowns a  
woman's life with such honor and hap-  
piness as this. We never yet knew a  
boy to turn out hopelessly bad who be-  
gan by being in love with his mother.  
Any man may fall in love with a fresh-  
faced girl, and the man who is gallant  
to the girl, may cruelly neglect his  
worn weary wife. But the boy who is  
the lover of his mother in her middle  
age is a true knight who will love his  
wife as much in her daisied spring-time

There is no law easier to enforce  
than that which forbids expectation  
in public places. All that is needed is  
to make a few arrests from time to  
time, which will serve as reminders to  
the general run of spitters that they  
are in danger of being made personally  
known as such to the community at

Strong Nerves  
Nerves just as surely come from the use of  
Hood's Sarsaparilla as does the cure of  
scrofula, salt rheum, or other so-called  
blood diseases. This is simply because  
the blood affects the condition of all the

bones, muscles and tissues. If it is im-  
pure it cannot properly sustain these  
parts. If made pure, rich, red and vital-  
ized by Hood's Sarsaparilla, it carries  
health instead of disease, and repairs the  
worn, nervous system and restores it to  
do. Thus nervous prostration, hysteria,  
neuritis, heart palpitation, are cured by
