WICK

Wins in Three Straight Heats, Nannie Talbot Gets Second and Yazoo Third Money in the Race on First Day.

The race in the class for horses that had never trotted better than three minutes, on the first day of the fair, was easily won by the bay stallion Wick, owned by Smith & Coons, of Lexington, Ky. The betting, what little was done, was in favor of Wick all along. The first heat was won in 2:37, the second in 2:31, and the third in 2:30. Nannie Talbot came in second, and Yazoo third in each heat. The brown stallion Whipple, Jr., was distanced on the second heat. There were but four horses started although seven had entered.

All the arrangements have been made to make the two hops this week delightful in every respect. Michael's celebrated band from Newport has been secured for both nights. Owing to the limited size of the rooms the gentlemen have been obliged to adopt some means to prevent them from being so crowded as to spoil the comfort and pleasure of those present; this being the only unpleasant feature of the balls of last year. The plan decided upon is excellent as it secures the entertainment of the visitors, and limits the crowd without the possibility of offending any one. No invitations were issued to the home people.

Instead of invitations, tickets of admission have been issued for all those taking part in giving the balls and no one is to be admitted without a ticket, that is the gentlemen and the chaperones, the young ladies of course do not need tickets. The young men have tickets for distribution to the strangers only, and all are expected to see that all visitors are provided. These tickets are neatly printed--white for Wednesday and colored for Friday--with a blank space for the name of the bearer and one for the name of the party giving the ticket. The tickets are not transferable. Tickets are distributed to only those of the townspeople who have aided in giving the balls, as no one can get offended because they have no tickets and can not attend.

This is done not because everyone is not wanted, for the young men would be glad if all of our citizens could attend but there is not room to accommodate them. The entertainments are not public hops but are more like private parties.

A COVERING of tobacco stems at the roots of a rose bush, to remain all winter, will prevent the ravages of all bugs which are foes of the plant, and is a sure death influence on the rose slug. When treated in this manner the bush produces a more vigorous rose, rich in color, because the roots are more capable of performing all the work nature designed them to do. In regions where cigar making is carried on extensively roses ought to be raised in great perfection.

English Boys Want to Learn Farming in Kentucky.

MAYSVILLE, Ky., Sept. 18, 1882.

EDITOR BULLETIN:—Will you be kind enough to give me sufficient space in your columns for the following which may be of interest to farmers. An English firm of good standing has been corresponding with me for sometime past relative to procuring positions for young Englishmen on Blue Grass farms. These young men are sons of gentlemen, and desire to learn how to farm, with the intention of locating in Kentucky. Some of them will have means when they come of age and others will have to depend upon their own exertions to secure capital. The firm alluded to makes the following proposition: Upon the agreement of a farmer to take a young man, the latter will leave England as early thereafter as practicable, pay his own passage to Maysville, and there expect to be met by the farmer. He will enter upon a time (one month) of trial, and at the expiration of that time, if he gives satisfaction, a bonus of \$120 will be paid the farmer, and he in return shall receive \$10 per month wages; the contract to expire at the end of twelve months. The young man shall perform the usual labor required of a farm hand, but he shall be treated as a farmer's son, he must have a separate room furnished him, and his board, washing, lights, etc.

If the contract is dissolved before the stipulated time of expiration, then the farmer shall return a proportionate part of the bonus. In order that the young men may get on farms of respectable size, the firm desires to locate them with no farmer whose farm has less than 200 acres, with 100 acres under cultivation, and whose stock consists of not less than seven horses, seven cows, and twenty-five head of other cattle. The firm would, however, prefer stock farms. A special provision of the contract will be that the young men shall be permitted to attend divine service on Sunday.

I have necessarily been brief, but for any further particulars I will be glad if those who desire young men of the kind and under the circumstances mentioned, will apply to me.

Several young men under the auspices of this firm have settled on farms in Fayette and Bourbon counties, but I regret that I am unable to say with how satisfactory results. I am informed that two young men are now anxious and ready to come out. I am sir,

Very truly yours, W. DUDLEY POWERS.
