If the Democrats will "quit their foolin'," as Sam Jones says, "the deep ters. I have no apologies to make for laid plans of the Rads will fall shattered to the ground." The Democrats can always be depended on to get mixed up in some sort of unnacessary factional squabble just about the time they sh u'd missioners and the commissioners at the present an unbroken front to the enemy. So it is now, the Goebel bill havir g set the old strife caldron to boiling just when a unity of purpose seemed to have been iga ed upon. I hope these bickerings wut all be dissipated and that we will win a signal victory in the next state election, but the Dimocrats who opposthe "force biii" are in no humor to tolerate bossim, and there must be no lavish display of it before the campaign it will work harm to Democrats. closes or it will prove a leaven for the ill of the party.

The cancus to nominate the three election commissioners provided for under the Goebel election law, has been called to meet to-night (Monday) at 8 o'clock, in the hall of the House. It is of Kentucky to believe there will be an said by inside sources that the following uprising in the party to have an honest slate has been cut and dried for selec tion, and that it will go through without a hitch at any point: Ex-Congrest ally bury the Democratic party in Kenman Wm. He has been on the ground for a week looking after his luterests.

The bills for the last two days of the session are scheduled to keep members of both Houses at work until midnight to-morrow night. As a write this every solon is up to his eyes in hard labor, or getting resolutions prepared for this afternoon's semion, when much legisla tion will be enacted finally. The enrolling clerks will be kept busy until a late hour to-morrow night and there will be a lorg list of bills resting in the calenday. Fully one third of the five handred bills introduced since the gavel fell on the opening day have been killed in committee, another third falled to pass both Hous-s and the remaining third are on the calendar or have passed But less than one hundred measures have passed either house and not nearly so many have peased both. Protshly not over forty bills will become laws as a result of the session.

The new prison commission will meet about Wednesday to elect a full set of officers who will take the places of the Republicans now in charge, if the bid passes muster and is not declared uncon. Not to be Attacked by stitutional, a thing the D mocrats say is impossible. The commission will present the names of the officers to the sinking fund commission and will be refused recognition for them. Then the mandamus proceedings for possesion of the places will be begun by the Democratic commissioners. The present encumbents are said to be ready to resist any attempt at usurpation until the law directs them to step down and out.

Powder for Big Guns. Wlimington, Del., March 14.-The powder works of the E. I. Dupont-De Mours company is now working day and night on a government order for hexagonal powder for the big guns. Until a day or two ago only the day force was at work, but it is said that orders from Washington necessitated the employment of a night force. In addition some of the buildings are being enlarged and more machinery is being put in. There are 26 grinding mills on the place, and these are now all running. The daily capacity of the works is said to be 10 tons of hexagonal powder. Work is also said to be hurried at the company's plant in New Jersey, near Gibbstown.

Finishing Big Guns. Washington, March 14. - At the Washington gun factory there are now in various stages of construction no less than 150 guns of formidable character on which work is being done night and day with a view to their early completion. No new guns are being started, but the entire efforts of the factory are devoted to finishing those now under way. A naval officer said there would be enough of them when finished to constitute a fair armament for probably thirty or more auxiliary cruisers, should such a large fleet be found necessary to supplement the regular warships.

All Are Kept Busy. Cleveland, March 14.-Warner & Swasey of this city are filling a large order for the government for telescopes, to be used on heavy guns for sighting purposes. They are also at work on a new model of range finder, which will be shipped to Fort Monroe, where it will be tested within a few days. The inventor of this device has been here several weeks superintending the construction. The Otis Steel company of this city is also filling a government order for deck plates for

Washington, March 14.-The Miantonomah, Katahdin, Minneapolis and Columbia are now all but ready to sail within a day or two, if so ordered. All the warships are coaled and have most of their stores aboard, and about all that remains to be done now is to replentsh their stock of ammunition. This will be done at the government magazine, a short distance below the navy yard, and all of the vessels will then be ready for sailing at a moment's

Portsmouth, N. H., March 14,-Plans for the placing of submarine mines for Portsmouth barbor have been mapped out and a large force of men have been actively at work near the fortifications. It is claimed, however, that these mines will be of little use, owing to the great depth of water in the river, there being over 10 fathoms in the channel from the entrance at New Castle to within a short distance of the navy yard.

No Report Necessary. Madrid, March 14 .- The governmen is momentarily expecting to receive the report of the Spanish commission which, it is understood, will maintain that the Maine explosion was internal. Although the American commission may give another explanation, the government will energetically uphold the Spanish report.

A Tugiond of Projectiles. Newport, March 14.—The tug Leyder eft the torpedo station for League island navy yard with torpedo outsits of 20 projectiles for the cruisers Minne-apolis and Columbia and torpedo boat Rodgers. The tug, has been detached

from this station, and will hereafter be attached to League Islan., navy yard.

Must Rely Upon Herself.
Paris, March 14.—Spain does not deceive herself when she counts upon the sympathies, at least latent, of European governments, but it would be mistake for her to expect any effectual the triple alliance. Therefore, she must rely upon herself.

Working Ten Hours. Washington, March 14.-Last week in order was received at Frankfort arsenal to work 10 hours a day, but whatever contract was involved has probably been completed, for the order has been rescinded. The average daily output of cartridges there is 38,000 rounds, but during the 10-hour day this could be increased by from 8,000 to 10,000. It is the only arsenal in the United States where small ammunition is made. The number of employes has been gradually increased of late from 600 to 700 workmen.

Arbitration Talked Of. London, March 14.-The Daily Graphic editorially suggests that there is still time remaining that be utilized to negotiate an agreement to refer the Maine matter to arbitration to ascertain the "true facts," and to decide as to the nature of the indemnity, if any be due to the United States. "England," says the Daily Graphic, "would sympathize with a war for the liberation of Cuba, but if the United States goes to war, it must be in a just cause and after every effort to secure an honorable peace has been exhausted."

Pushing the Work. Bethlehem, Pa., March 14.-The Bethlehem Iron company has received orders to push all government work as yet unfinished on the 100 10-inch and 12-inch guns and carriages, and the force of skilled mechanics in all departments is working night and day.

Prepared to Move Promptly. El Reno, O. T., March 14.-No orders for the immediate movement of troops have been received, as far as known, at either Fort Sill or Fort Reno, O. T. The troops at both points, however, are prepared to move at a moment's notice, having been placed on orders last week.

Only Platonic Sympathy. London, March 14.-The Paris correspondent of the Daily Mail declares French support of Spain "would not exceed platonic sympathy," and that there is no likelihood that the friendliness of Austria or Germany would ex-

Movements of Ships, Key West, March 14.-The battleship Iowa arrived from the Tortugas and is anchored off here. The torpedo boat Dupont sailed with mail and dispatches for the fleet at Tortugas. She will relieve the torpedo boat Porter, now at the Tortugas.

Tons of Powder. Valparaiso, Ind., March 14.-The Actna Powder company, at Miller Station, powder and 200 tons of dynamite cartridges from the war department. The works will be run day and night.

Only One Ship Left. Washington, March 14 - The ordering of the Helena and the Bancroft. now on the European station, to the United States will leave Admiral Howell, commanding that station, with but one vessel-the San Francisco.

Perfecting Its Plans. Washington March 14 .- The government is perfecting its plans to make the movements of troops to the coast defenses, orders for which were issued by the war department on Friday and published at that time.

Nearing the End. Havana, March 14 .- It is thought that the Maine court of inquiry will close its labors here during the present week, and will probably re-examine some of the survivors of the Maine at

All About a Woman. Brazil, Ind., March 12. - Frederick Krach was shot and mortally wounded by Frederick Ellis at the home of Mrs. Andrew Brewer of this city, who recently secured a divorce from her husband. Ellis was co-respondent in the case and made his home with Mrs. Brewer. Krach went to Mrs. Brewer's house and requested to be allowed to spend the night. Ellis objected, and words passed which ended in Ellia drawing his weapon and shooting

Glass Plants Resume Anderson, Ind., March 12 .- National officers of the Windowglass Blowers and Gatherers' and the Windowglass Cutters and Flatteners' National associations effected a settlement of the questions which have closed several plants and threatened to close all in the country. The blowers and gatherers withdrew objectionable workmen. an plants resumed.

Negrock Use Cocame Paducah, Ky., March 12.-So great has the cocaine habit grown among the negroes here that they secretly peddle the deadly drug about the streets at 16 cents a sniff. The police say that hundreds of negroes are dying by inches in this city from the use of cocaine.

It Is Now a Law Frankfort, Ky., March 12 .- The Goebel election bill pased the house-59 to 32-over the governor's veto, and is now a law. During its passage two of the members. Depp and Elmore, engaged in fisticuffs, but peace was re-

President Feels Relieved by the Action of Congress-Secretary Alger And The

a Parvenu Congress-

WASHINGTON, March 16 .- [Special.]-Already there is speculation as to what will happen in Cuba in case the rule of Spain in that island comes to an end or the power of the United States is thrown over the colony in such a way as to assure a permanency of peace. Men who know Cuba from one end to the other tell me in their opinion the island will enjoy a period of prosperity such as it never saw before. The rehabilitation will be among the mar-vels of the world for swiftness and completeness. It is well known that Cuba is rich in soil and resources. All the world stands read; to buy her tobacco and her sugar, her coffee and her woods. Given an enlightened and settled government, given security for capital and business, and Cuba would attract the enterprising and speculative young men from all over the world. Property now worthless or nearly so, because overrun with weeds in that luxuriant semitropical clime, with its buildings in ruln and its people scattered or dead, would be made to blossom as the rose. Many thousands of men would go out from the United States to take a share in the work of rehabilitation, to invest their capital, to give the Island the bless ing of American thrift and practicality There is hope for the Cubans who yet live, as they appear to be upon the dawn of bet-

President's Interest In Cubs.
President McKinley, says a member o President McKinley, says a member of the cabinet who knows whereof he speaks, has not gone to bed one night in the last three or four months without taking the question of Cuba along with him. It is the one question which has absorbed his energies and his thought. After the wreck of the Maine the president was for a cou-ple of weeks unable to sleep well. The re-sponsibility resting upon him worried him. sponsibility resting upon him worried him and led him to fight it all out on his pil-low. His health did not suffer seriously, but he became noticeably paler and more nervous. The strain, the long hours durnervous. The strain, the long hours dur-ing which it was impossible to shake off thought and speculation and that weigh-ing of every circumstance and consideration which a conscientious man finds un-avoidable under such conditions, had their natural effect. But this has now to large extent worn away. Since the president perceived the splendid manner in which the American people were standing by him, without a dissenting voice in congress, and with jingoism and conservatism all coming to the same level of patriotism, he has slept better and felt more confidence in the future and in himself.

Compared with the conscientionance United States I want to point out to you an instance of another sort. It is not o much importance, and under the circum stances I do not feel at liberty to give the gentleman's name, though I am strongly tempted to do so. He is a representative in congress from a northern state. He was appointed by Speaker Reed a membe of one of the most important committees of the house. This committee has been at work nearly all winter upon a scheme of legislation which the country evinced great interest in and which would have been of vital consequence to the nation had not the foreign complications eclipsed it. Yet the committee has never once been able to secure the attendance of this member. He has been sent for a dozen times and has been urged to take his place, but has never appeared. His fellow commit-teemen do not know what his views are; they do not know him by sight, some of The man spends most of his time playing poker and carousing around, and he doesn't care a rap whether there is any legislation or not. Indeed it takes all kinds of men to make up a world.

Klondike Relief Expedition Some of the newspapers have tried to criticise Secretary Alger for plunging into the Klondike relief expedition and spend-ing so much of the public money therein. But these criticisms are in very poor taste. It is true that at the time the secretary asked congress for the appropria gave the orders for buying the reindeer in Norway there were many well informed men who thought relief was not needed by the minutes and that the miners and that they could take care of themselves. It will be remembered that I took the same view in these dispatches, after a careful study of the situation. But there was no certainty that this view was correct. It might turn out, aftor all, that thousands of miners would starve if relief were not sent in by the government. Secretary Alger simply act-ed upon the theory that as long as doubt remained it would be almost criminal of the government to neglect every possible precaution. He acted wisely and humaneprecaution. He acted wisely and hu ly, and criticism of him in this conn is very farfetched indeed. The public, which believes the American government should stand by American citizens, wherever they are, whether in a foreign land or faraway Alaska, will praise rather than

ondown the secretary for his foresight. Besides, it is likely to turn out a good heides, it is likely to turn out a good investment. Not much money has actually been lost. The herd of 500 reindeer imported from Lapland by special stoamer are worth every cent they cost. Alaska needs reindeer, and the more of them there the better. The day will come when they may be worth their weight in gold in sav-ing human life. Moreover, the 500 ani-mals could how be sold at about what it cost the government to place them in low-er Alaska. The war department has an offer of \$100 apiece for a herd of 300, and the cost was between \$80 and \$00 each, ev-erything reckoned in.

Cornelius Vanderbut fived in during his short stay in Washington. To this house the congressman is fond of inviting his friends, and to every guest he says with perhaps pardonable pride:
"Mebbe you don't know that next door

to us is the house Mr. Vanderbilt lived in. We're getting up in the world, you

But for the life of him this congressman cannot get over his old habit of calling the 7 o'clock evening meal "supper" instead of "dinner," greatly to the annoyance of his fashionable wife and daughters. WALTER WELLMAN.

CONCLUDED TO WAIT. Indiana Republicans Net In a Hurry to

Call Their Convention. Indianapolis, March 10 .- A meeting of the Republican state committee was held here for the purpose of completing the party organization for the state campaign.

All the members of the committee were present or were represented by proxy when Chairman Hernley announced his executive and advisory committees.

The sentiment of the committee was that in view of the unsettled state of national affairs it might be well to wait a few weeks before fixing a date for the state convention. The committee fixed the basis of rep-

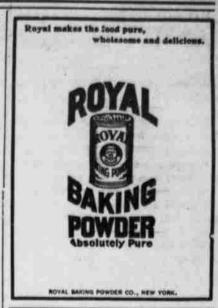

resentation on the state convention at one delegate for every 200 votes and a fraction of over 100 votes cast for the first elector on the Republican ticket

Looks Like a Strike. Fairmont, W. Va., March 11 .- Representatives of the United Mine Workers of America are preparing for another strike in West Virginia if the Chicago scale is not accepted in this state by April 1. Vice President John Mitchell is here assisting the local officers, and they are unable to get the operators to hold any conferences with them. The operators refuse to consider the proposition, and the men say they will strike if the scale is not adopted next month.

Merchandise Stock Sold.
