WEAR STRIPES NOW!

The Illinois Central passenger cars now wear gold stripes on their coal cars, and many questions are asked as to the reason.

They tell how many miles the cars have run, and how many days the company has been used, and that each individual has some number, and for this old seen car is sometimes added.

It has been known for years five years or more, and each car has a number.

As the Illinois Central passenger cars are of the same type, the number is the same on each car, and it is a matter of some interest to know how many miles these cars have been run.

The numbers are pasted on the cars, and the men paint the numbers on the cars, and the numbers are taken from the company's supply, each band having a number from 1 to 9999.

I. W. R. Gibb was present and said when long a man has been in the passenger service, he can tell how long a man has been in the service.
