It is not generally known, but this was once the richest section in Adair county. That was before the war. The Blackburns, the Turks, the Cooks, the Grisoms and many others who were then among the richest families of the State had their homes here. They owned large farms and numbers of slaves. Farms changed hands at eight and ten thousands dollars. There were large fields of blue grass, horses and cattle were raised in large numbers, but the war come on. The negroes were freed, the leading families moved to other sections. The farms were allowed to go down and soon the blue grass was displaced by sedge. Where red top and clover fields once furnished hay for large numbers of stock now may be found thickets of dogwood and sumac. Some places have washed in deep gullies. The fencing has gone to decay and so now farms that fifty years ago was worth a thousand or so dollars can now be bought for a few hundred. The land is just as good. It will make one thousand pounds of tobacco to the acre. It will grow just as good red top and clover as ever. Blue grass will yet thrive and so all that is lacking is a few dollars invested in fencing etc., and men who are willing to work to make this one of the richest sections in the proud old Commonwealth.
