## Hogs in the Country.

A feature of interest in the hog report by L. J. Schwabacher & Company, of Chicago. These authorities went to great trouble to compile this report on the situation which is fought with such intense interest to the trade at this time. They obtained reports on the conditions from nearly every county in eight hog-raising States concerning the percentage of hog population as compared to a year ago, the number of hogs, condition of spring pigs and time this pig crop would be ready for market.

A study of the details of this report shows that 24 counties in Illinois report 60 per cent.; 23 counties in Iowa, 64 per cent.; 7 counties in Kansas, 70 per cent.; 6 counties in Missouri, 72 per cent.; 4 counties in Nebraska, 53 per cent.; 4 counties in Minnesota, 84 per cent.; 7 counties in Ohio, 60 per cent.; 4 counties in Wisconsin, 75 per cent., and so on. The report of prospects is for a big pig crop and the condition of spring pigs is very generally reported as exceptionally good. In some localities breeding animals had been so generally disposed of that the pig prospect is bad.

## To the Road Overseers of Adair County:

Our road law provides that all able bodied, male citizens of the County, over 18 and under 50 years of age, except licensed Ministers of the Gospel and citizens of incorporated towns and cities, shall provide themselves with necessary tools and implements and work not less than six days of 8 hours each in each year on their respective roads. The Chairman of the Board of Trustees of each Common School District is also exempt. The Overseer must notify hands at least two days in advance of the time of working said roads, and he cannot compel them to work more than two days in any one week, except in cases of emergency, he may work them more than two days in one week, or six days in each year. The Overseers are required to report any failure or refusal on the part of the hands to work, to a Justice of the Peace or to the County Judge.

A failure on the part of any Overseer to do his duty, as provided by law, subjects him to a penalty of from \$5.00 to \$15.00 and the costs, for every such failure, while a failure or refusal of each hand to work the road, subjects him to a fine of \$2.50 and costs for each day he so fails or refuses to work, after having been notified, as required by law. Where fine and cost are not paid in cash, those convicted will be put in jail and worked on the rock pile, or public road, under the Jailer's supervision, until same are paid. The notice of the Overseer is not required to be in writing, but may be verbal, and an Overseer may authorize some person in writing to give said notice for him.

Each Overseer is authorized to give his hands three days of his time on the road for one day's hauling on the road with wagon and team, or plowing with team. He is also required to have his road worked according to this law by the 1st of October in each year, and make his report at the October term of the Fiscal Court and he shall be allowed \$3.00 for his services.

The above is a synopsis of our present road law and I trust you will enforce it to the fullest extent during your term of office, for in no other way can we hope to have good roads, which are so beneficial to the entire county. If, after working the 6 days, as above, you could induce the citizens of your community to haul gravel on the road, you could, in that way, make a little road each year that would be absolutely first-class for a time. We may not succeed in attaining so much for a year or so, but by continued effort and agitation along the lines suggested, together with a judicious expenditure of a small road tax, we can eventually secure the best roads in this part of Kentucky.

An Overseer must serve two years from the day of his appointment.

Very Respectfully,

N. H. MOSS, County Judge.

## A Dreadful Wound.

From a knife, gun, tin can, rusty nail, fireworks, or of any other nature, demands prompt treatment with Bucklen's Arnica Salve to prevent blood poison or gangrene. It's the quickest, surest healer for all such wounds as also for Burns, Boils, Sores, Skin Eruptions, Eczema, Chapped Hands, Corns or Piles. 25c at Paul Drug Co.

## The Roundup.

How a woman does enjoy being tired if it is from shopping.

Our love for other people's money is also the root of much evil.

A man can have most of his vices overlooked by inheriting a fortune.

The sermon never seems so long to the woman wearing a new hat to church.

Columbia, Ky., June 8th, 1910.

Yet there is always a fighting chance against marriage being a failure. The payrolls of the enlisted men in the navy during 1910 will aggregate nearly \$18,000,000. Canada's total mileage last July was 30,330 miles. This means that there is one mile of railway for every 300 inhabitants. A translation of the Scriptures into modern, idiomatic Spanish is being prepared for use in Puerto Rico, Cuba, Mexico and South America. The sea kale used as food in China comes largely from the coast of Saghalien, where the leaves average one foot in width and forty-five in length.

The conditions in the Hnpeh province of China are regarded as serious. Whoopee!

## Kept The King at Home.

"For the past year we have kept the King of all laxatives—Dr. King's New Life Pills—in our home and they have proved a blessing to all you family," writes Paul Mathulka, of Buffalo, N. Y. Easy, but sure remedy for all Stomach, Liver and Kidney troubles. Only 25c at Paul Drug Co.

## Weaving of the Web.

"It is better to weave in the web of life a bright and golden filling." The words rang out with such cheerful decision that the teacher at the school for the blind and I paused before the open door. A young blind girl was reciting to a group of companions. They were all so cheery and optimistic, in spite of shadowed lives, that I could but express my surprise.

"Yes," answered the teacher, "you have there a practical illustration in 'the weaving of the web'; the bright and golden filling is certainly being threaded in by my girls."

What sort of filling are you and I weaving into the web? Dark threads or bright? Many of us grumble and fuss more over trifles than others do over buzzing knots. Each weave has snarls to unravel, and the patterns are often intricate and uncertain, but courage, hope, and persistence accomplish much, and their possessor is not apt to be of the kind that "blames heaven for tangled ends."

The loom of life is going steadily on, and each day's work adds threads to the web that will be unrolled in eternity. See that many of them are "bright and golden."

## A Woman's Great Idea.

Is how to make herself attractive. But, without health, it is hard for her to be lovely in face, form or temper. A weak, sickly woman will be nervous and irritable. Constipation and Kidney poisons show in pimples, blotches, skin eruptions and a wretched complexion. But Electric Bitters always prove a godsend to women who want health, beauty and friends. They regulate Stomach, Liver and Kidneys, purify the blood; give strong nerves, bright eyes, pure breath, smooth, velvety skin, lovely complexion, good health. Try them. 50c at Paul Drug Co

## The Editor Has His Troubles.

The editor of a local paper is often unjustly censured for his mistakes. The wonder is that he does not make more of them. On the average his paper must deal with all kinds of subjects, give the names, date, etc. One hour he may be engaged in reporting a religious meeting and the next drawing the picture of a fight. He must condense and fill with his items several columns whether events are transpiring to throw up material for his use or not. Count the local items in a paper and imagine how many steps they have

required, how much mental anxiety, worry and work they have cost and some idea of editors, work can be gathered. The smallest may have cost him a long walk and much effort to reach the facts. There is no end to his work, when one paper goes to press he turns his attention to the next one. He makes the rounds in search of news and may not get a line. From some he must get news without their knowing it, drawing them into conversation and obtaining what he wants in sections. He may labor for hours in chasing down a rumor only to find that there is nothing in it. His local columns stare him in the face and demand to be filled not with skim milk but with cream of the news events and matters of interest. His bounds are limited and yet he must find in each day and all through the week, month and year something of interest to the public. No more perfect treadmill could be devised. With such a constant strain, producing weariness of the body and mind and an almost endless variety of subjects to be touched upon, is it surprising that he should occasionally make a mistakes? Other people do, why shouldn't an editor?

## Picnic.
