CAN'T FOOL FARM BUREAU

We learn through the New York World that "congress resents the \$16,000,000 farm federation lobby," this in a "special dispatch" which might be even deliberately aimed at the destruction of the American Farm Bureau Federation, now found very annoying to certain members of the national legislature who speak for interests opposed to agriculture.

A great hue and cry is raised about the enormous salaries paid to the personnel of the Farm Bureau Federation. J. R. Howard, the president, is quoted as receiving \$15,000 a year, and the secretary, Mr. Cloverdale, receives \$12,000; the treasurer and assistant secretary get \$8,000; Gray Silver, the director, \$12,000; and so runs the list covering the department of marketing, the legal department, the information department and so on.

It is shown that approximately \$75,000 a year is spent in salaries. These "startling figures" may frighten the farmer, who has no conception of such fabulous salaries, and perhaps he may revolt, is of course the hope.

As a fact, the cost of the whole personnel does not foot up the salary of any one of a hundred heads of the great business organizations who would like to destroy the Farm Bureau Federation, put an end to the farm bloc and yank the tiller of the soil back into the yoke.

It is said the bureau has grafted itself upon the federal organization; made possible the Smith Lever act; and is now the dictator of the farm bloc. If that be so, then senators who form the bloc have operated much more efficiently in the interest of the heart of America than the independents who roll the pork barrel without dictation.

If there is anything wrong with the farm bureau it will be corrected, but the body will not be disintegrated.

The farmer has just felt his own strength. He is merely stretching at the present time.

NEW POULTRY BOOKLET IS READY FOR FARMERS

"Helpful Hints for Poultrymen," is the title of the latest publication from the College of Agriculture, the new booklet now being ready for free distribution to interested farmers and poultrymen. It answers the question, "Which is the best breed of chickens?" and then gives a detailed discussion of such things as selecting layers, breeding for eggs, culling, management hints, feeding, laying hens, chick feeding, artificial brooding, fattening, housing and poultry pests and diseases. The booklet, which also contains a list of reference bulletins and circulars, may be obtained free by writing the Experiment Station at Lexington.

When truth goes into battle it always fights in the front ranks.

HEFLIN'S CONTRAST OF TWO ADMINISTRATIONS

In the tariff debate the other day, Senator Heflin, of Alabama, drew the following interesting and amusing contrast of conditions in this country between the Wilson and the Harding administrations:

When these Republican spellbinders get on the hustings this fall they are going to face old Uncle Johnny and Aunt Mary, who are not able to own an automobile under a Republican administration. They used to have one under Democratic rule. Nearly every fellow in the country when they had any sort of a meeting at the crossroads or in the town or city would come in and you could hear these horns, "Honk honk!"

They were just whirling everywhere, like bees around a hive. That was under Democratic rule; and you could take up collection for any purpose and they would reach up in the inside pockets—they did not go in these little watch pockets then and fish out a dime, like they do now—they would go in their inside pockets under Democratic rule and take out a pad of bills and just give liberally, with a smile. You would say, "Many thanks." They would say, "Don't mention it. The Democratic party is in power." Why, we had a glorious time; and now, where the automobile used to stand the old man says to Jimmy, "Hold these steers."

"Respect all the laws." By all means. But in these days of rapid-fire legislation you have to step lively to do it.

Henderson county farmers and fruit growers are planning to make an elaborate fruit display at the coming Kentucky state fair, according to County Agent D. W. Martin, who has been appointed to take charge of the exhibit. Many individual fruit growers and farmers are expected to enter fruit in the exhibit, he said.

J. W. Lile, a farmer living in the Clarkson community of Grayson county, is succeeding in demonstrating the value of limestone and acid phosphate in increasing wheat yields to farmers in that section, County Agent R. W. Searce says. Last year he obtained good results by using two materials on his wheat and this year is planning to use more limestone.

DISTRIBUTOR WANTED

We want a man in this territory to act as our exclusive distributor, appoint sub-dealers and sell to jobbers and stores our well advertised line of Del Monte candies, nuts, dates, figs and fruit cordials. Party accepted must be financially responsible and able to handle his own stock of goods. Expenses to Louisville if you qualify.

Volume Savings Permit Greater Value

There are hundreds of parts in a motor car. Many companies buy all, some makers build a few, of the parts that go to make up a complete motor car. For every part they buy, a partsmaker's profit must be included in the final price.

Studebaker builds every vital part. Motors, bodies, axles, transmissions, frames, tops and other parts are designed and manufactured completely from raw material to finished product in

Studebaker plants, under Studebaker control and inspection.

The savings, because of tremendous volume, give the buyer extraordinary value.

Complete manufacture also explains the uniform high quality that you get in a Studebaker car, whether it is a Light-Six, a Special-Six or a Big-Six.

And uniform high quality has made Studebaker cars known everywhere for their dependable performance in owners' use.
