That's how the tale reads. We infer what really happened.

The buyer, as usual, went by the cost of paint; got bids. Lead-and-oil bid low and guessed the quantity low: the saving was only 11 per cent.

Nobody seems to have thought of this: the painting costs two or three times as much as the paint. How much did we save on the painting? Don't know.

A Great Day.

At least thirty-thousand people of Butler county got up early, last Thursday morning, dressed up, and hitched up or went to the railroad stations, and sie trains had to return to Canery and Chicora and Keister, that morning, to within a few weeks.

The managers of the Fair do not care to give the exact figures.

The crowd, Thursday, was so great that one could see nobody or nothing, and the affair resembled that of the King of Spain who "with forty-thousand men marched up a hill and then marched down again."

The street cars and hacks hauled the crowd without accident, excepting the triding affair on the steep place near

the Centre avenue bridge; and there were no accidents to human beings on the grounds, excepting the bumping of the Italians who ran across the track in front of the horses.

Labor Day.

Next Monday is Labor Day, when a great crowd is expected in Butler for the Fourth Annual Celebration of the holiday by the Unions of Butler. Jos. In addition to the three brass bands and all organized labor of the town, the glass blowers of Parker will take part in the parade.

At Alameda Park, in the afternoon, addresses will be made by Hon. D. A. Hays of Philadelphia and Lev. McQuistion of Butler. An orchestra of ten pieces will farnish the music for dancing the dancing of the control of the parade.

The entire show is giving satisfaction and playing to good business. Don't fail to see it. For next week Manager Walters promises something unusually good in the vandeville line.

July 14, when the Special was held up behind a freight wreeck, which blocked all four tracks on the Middle Division, entailing a loss of two hours and twenty-two minutes in the regular arriving time at New York.

It is difficult to find a match for this record. It demonstrates that the schedule has sufficient elasticity to take up any ordinary detentions which may occur between termini, and that even a faster regular schedule may be made should it be deemed wise. The fine condition of the roadbed, the efficient motive power, and skillful operation all notive power, and skillful operation all ontribute to the ease with which the special accomplishes its work.
