MISSISSIPPI RIVER POST LIGHTS.
 Notice is hereby given that on or about February 20, 1900, post lights, as follows, will be established on the Mississippi river below New Orleans:
 —A fixed white lantern light, suspended from an arm attached to a white post, 35 feet above the water, on the northerly bank of the river at the new canal above Lucas.
 —Fort Jackson Post Light (after No. 992)—A fixed white lantern light, suspended from an arm attached to a white post, 35 feet above the water, on the southerly bank of the river, on Fort Jackson Point.
 —Jesuit Bend Post Light (after No. 1002)—A fixed white lantern light, suspended from an arm attached to a white post, 35 feet above the water, on the westerly bank of the river, at the Catholic Church in Jesuit Bend.
 On the same date existing post lights, as follows, will be moved to new locations:
 —St. Philips Bend Post Light—This fixed red lantern light will be moved about 1/2 mile to the eastward, to the house next below its present position, and re-established on the northerly bank of the river, about 1/2 mile below Port St. Philip, in order that it may serve as a better guide in coming down stream.
 —Harris Bayou Post Light—This fixed red lantern light will be moved about 1/2 mile northwesterly from its present position and re-established on the northerly bank of the river, opposite Point Celeste, to serve as a better guide to clear the shoal below Point Celeste.
 —McCall Flat Post Light—This fixed red lantern light will be moved about 1 mile to the northward of its present position and re-established on the easterly side of the river, about 23 miles below New Orleans, about the upper side of Bertrandville, to serve as a better guide in going up and coming down stream.
 Note—More detailed information will be published in the Board's Monthly Bulletin, after this notice has been carried into effect.

GOLD DUST

The Best
 Washing Powder.
 Woman's Best Friend. Dirt's Worst Enemy.

A consumptive patient, who made use of Ripans Tablets, found his weight increased but was made anxious because expectoration ceased, and feared on that account that harm would result, but on consulting a physician he learned that Ripans Tablets do not affect the conditions of the lungs in any material degree, but if they do so at all they have more tendency to favor expectoration rather than to suppress it. Consequently there is no reason why a consumptive should discontinue the use of Ripans Tablets because expectoration has ceased. Furthermore, in lung troubles an increase in weight is the best indication of improvement, and as the Tablets regulate the digestion they increase nutrition and are doing the very service required to produce best results.

A new style packet containing TEN RIPANS TABLETS in a paper carton (without glass) is now for sale at some drug stores—for FIVE CENTS. This is a special offer intended for the poor and the economical. One dozen of the five-cent cartons (25 tablets each) may be had by mail by sending forty-eight cents to the RIPANS CHEMICAL COMPANY, No. 10 Spruce Street, New York—or a single carton (TEN TABLETS) will be sent for five cents.
