

NO PROGRESS MADE ON MINE WAGE SCALE

Sessions of Conference Were Resumed at Phila- delphia Yesterday.

PHILADELPHIA, Oct. 11.—No material progress was made yesterday at the first session in this city of the joint wage conference of the Central Competitive Coal Field, embracing Ohio, Indiana, Illinois and Western Pennsylvania. The deadlock, which was reported when the conference adjourned at Buffalo last week to reconvene here, apparently remained unbroken. At the conclusion of the day's session, Ellis Seares, spokesman for the miners, and Thomas Brewster, of Illinois, representing the operators, declared that the conference had not "cleared the atmosphere at all."

Mr. Brewster said the operators had not received "one inch" from the stand they took at Buffalo, which was that the federal control shall remain in force until April 1, 1920, "unless some other demands can be substituted by the miners than have yet appeared."

Representatives of the mine workers contend that they have fulfilled their side of the contract, that the war is over and that for all practical purposes "the federal contract" has come to an end.

The meetings are being held behind closed doors and it was not announced which of the miners' several demands were under consideration today. It was stated, however, that unless there is a modification of these demands, which include a six hour day, five day week, sixty per cent. increase in wages and that all contracts in the bituminous field shall automatically cease November 1, there would be no agreement.

The mine workers threaten a general strike in the soft coal field on that date unless their demands are granted.

Entertained Last Evening.

Mrs. W. Spray Linn was hostess last evening at her home in Woodlawn park to a number of young people honoring the eleventh anniversary of the birth of her niece, Miss Mary Hamilton. About twenty young folks were entertained in a delightful manner with out-door games and refreshments were served.

KLIM The Powdered Fresh Milk

The Milk of the Future.

We eat food for two main reasons. First, to renew body wastes and promote growth, by forming new tissues and fluids. Second to supply energy for carrying on body functions. Good rich milk contains the body building materials (protein and mineral substances, such as lime and phosphorus) and also supplies energy for carrying on the body functions.

Klim the Perfect Milk.

All the protein, milk sugar, butterfat and minerals, as contained in the highest grade of Whole Milk, is present in Klim, equally good but lacking in butterfat. It is Klim Skim Milk. The Double Cream, mixed from Klim Whole Milk, contains more nourishing than Cream taken from liquid milk, because it contains the solids of the milk, while the other cream, taken off the top of the milk, contains only butterfat.

There are no germs or impurities in Klim.

Klim is used in hospitals, sickrooms and nurseries, on account of its good qualities, as your physician.
