Specifically designed for farmers

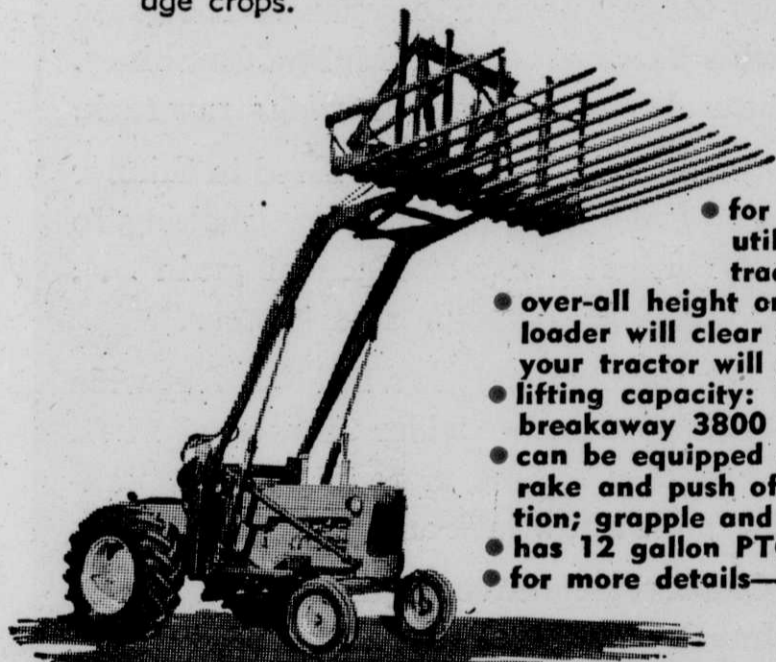

HARSH Hydraulic Hoist

This 3-stage hydraulic hoist is made for single axle farm trucks with stake, platform or regular boxes with steel or wooden stringers.

- when a Harsh hoist is installed, the position of the box remains unchanged
- cost of a Harsh averages only 18c a day
- this model designed for boxes 8' to 14', but there is a Harsh to fit any truck
- can be used year-round for dumping grain, feed, hay, manure, gravel, etc.
- for more details—mail coupon

JOHNSON Work Horse Loader

A model 9500 Johnson Work Horse loader is the fastest way to stack bales, handle loose hay and other forage crops.

- for try-cycle and utility type tractors
- over-all height only 75"; this loader will clear anyplace your tractor will go
- lifting capacity: 1800 lbs.; breakaway 3800 lbs.
- can be equipped with sweep rake and push off combination; grapple and manure fork
- has 12 gallon PTO pump
- for more details—mail coupon

Side or rear mount

PAR-MEL Clipper Mower

Hay industry's first really practical mower — finishes your most difficult mowing job in 1/3 less time with even cutting distribution throughout.

- twin "live" sickles perform without clogging
- versatile mowing action extends from minus 45 to plus 90 degrees above horizon with complete cutting dependability in all positions
- may be used as both right and left mounts
- readily adapts for conventional uses
- complete hydraulic control from tractor
- for more details—mail coupon
