Kaiser Ready to Start War Weeks Before Assassination

(By Associated Press.)
WASHINGTON, Sept. 21.—Another convincing link in the proof that Germany was preparing to start a war of world conquest at least six weeks before the excuse for it was offered by the assassination of the Austrian heir apparent at Sarajevo, concludes the amazing series of disclosures which the American government has given to the public through secret documents brought out of Russia.

Two authenticated documents are included in the final chapter of the story which began a week ago with evidence removing any doubt that may have existed that the Russian Bolsheviki government, headed by Lenin and Trotzky, is a tool of the imperial German government. One of these is an original circular from the German general staff dated June 9, 1914, directing that all industrial concerns be notified to open their secret instructions for industrial mobilization.

They to German banks to establish close and secret relations with American and Finnish banks; of the launching of revolutionary propaganda against the czar's government in Russia as early as November, 1914, and of instructions to German diplomats in all neutral countries to cooperate with agencies set up in those countries for stirring up social unrest, strikes and sentiment against war within the enemy states.
