Every Dollar Goes Into Development

The first allotment of the stock will be sold at
TWENTY CENTS

The Property of the Company Consists of Four Mines:

The MINNIE L with a 100 foot shaft and 300 feet of drifts, all in ore.
The SOUTHERN BELLE, with 400 feet of tunnel and a 60 foot winze, in ore.
BILLY BOY, with prospecting done exposing a large body of ore.
CROWN POINT, with prospecting done, showing a large body of ore.
The four claims lie in such position that 5,500 feet of ore can be seen on them.
The property is situated three and a-half miles west of the famous Comstock lode and on a true fissure.
In order to put a mill on the property, the company has decided to market 200,000 shares of stock at the low price of

Twenty cents a share

JUMBO MINING & MILLING stock is the best investment now offered in Northern Nevada. Its property consists of two developed mines and two developed prospects and as fast as the proceeds come in from the sale of this allotment of stock, it will be put into actual work at the mine.

The company owns 60 inches of water right and has a contract for power with the Truckee River General Electric Company, the power line crossing the Jumbo property. Electric power, the cheapest in the world, will be used to mine and mill the ore and expensive fuel will not be required.

If you want to make some quick money, buy JUMBO MINING & MILLING at 20 Cents while it lasts. The price of this stock will be one dollar as soon as this allotment is sold. Wire or write for stock reservations to the JUMBO MINING & MILLING CO., Carson City, Nevada, and certificates will be sent to your bank with draft attached. DO IT NOW.

Goldfield Diamond Drilling and Mining Company

Goldfield, Nevada

At 25 Cents per Share

A Mining Company with a business feature that insures a working income to the company indefinitely.

A Mining Company that will operate, not on one claim, but on many

A Mining Company that intends to have many paying mines

The stock of the company will rapidly go to par and above, and the company will be a big dividend payer.

BECAUSE

The Goldfield Diamond Drilling and Mining Company is a mining company; it is also a mining company with a business feature that will give the Company an income from the day it puts its first drills to work.

Goldfield is new, it has only just become learned that the gold ore lays in zones in the district, and just realized that these zones can be located, assayed, and their value determined with diamond drills.

With one 1,000 foot drill it can bore 20 prospect holes of 1,000 foot depth, pull the cores and assay every foot of them for less money and in one-tenth of the time that it could sink and timber one 500 foot shaft of the same ground.

The Goldfield Diamond Drilling and Mining Company will put six diamond drills in the field. The income from two of these drills on contract work will pay for operating four drills on our own claims, or on claims we may lease. When high grade ore is struck the income from our drills on contract will pay for sinking our shafts. In brief, the Goldfield Diamond Drilling and Mining Company is a mining company that after its first equipment of drills is in the field will be self-supporting.

The company will mine the ore it locates, and that it will locate ore in this rich district is almost beyond question. The possibilities of the Company are unlimited.
