the experience of eminent public men is found

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies, extracted by chemical process in a state of purity, and combined together in such a manner as to insure the best result. This system of composition for medicines has been found in the Cherry Pectoral and Pills both, to produce a norrestimate. more efficient remedy than had hitherto been tained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove as they

proved more purely remedial, and the Pills a sure more powerful antidote to disease than any other medicine known to the world. As it is frequently expedient that my medicia should be taken under the counsel of an attenuit Physician, and as he could not properly ju remedy without knowing its composition supplied the accurate Formulæ by which be Pectoral and Pills are made to the whele he Practitioners in the United States and British American Provinces. If however there should be at one who has not received them, they will be promptly forwarded by mail to his address. Of all the Patent Medicines that are official before the control of few would be taken if their composition was known.

The composition of my preparations is laid of to all men, and all who are competent to judy of their intrinsic merits. The Cherry Pertoral was pronounced by scientific men to be a wonderful medicine before its effects were known.
