Shortness of Breath Cured.

YOUR THROAT is red and ulcerated. There are little patches or ridges, or which or yellow ulcers in your mouth as far back as you can see; the same ulcers or congested condition may be in your nose, bronchial tubes or lungs. Perhaps you have a cough; if no cough now, you will have as soon as you take cold. You will then begin to raise a froth, then a slight mucous, then a heavier phism until very thick, as the disease advances. There is one physician of great experience in our midst, he has had experience in all parts of the world, in bospital and special practice in the treatment of these diseases. This is DR. S. CLAY TODD, who has had a practical knowledge of the treatment required, and has the remedies shipped directly to him from the countries where they grow, and these remedies are who has had a practical knowledge of the treatment required, and has the remedies shipped directly to him from the countries where they grow, and these remedies are compounded by him and put up for use before each patient in his office, New Jewell In Calumet, at the New Jewell House, Until House, Calumet. The cough that occurs at this time is dry, comes at yarying intervals, is backing in character and is usually most troublesome in the morning upon arising or on going to bed at night. This peculiar character of cough is often the first evidence that catharral disease is extending into the lungs. About this time you will have sfortness of breath and palpitation of the heart which always goes with consumption. You should then immediately call on Dr. S. CLAY TODD and he will give you relief.
