Company's Production Will Show Falling Off This Year

The directors of the Quincy Mining Co. will meet within the next fortnight for sividend action and it is expected showing the are bodies to increase ! to be \$1.50 compared with \$1.25 three months age and \$1 in February. On the present price of copper the company is varuing \$12 a share which is more than double the present dividens rate of \$5. It is now costing the company about 11% cents to a pound by groduce its copper, the highest in five years and comparing with 10.62 cents in 1911. The increased cost is due to the racent advance to miners wage and unusual charges for new construc-Owing to scarcity of labor at the Lake the company has been un able to keep its production up to the average of the past five years and it will do well to show 21,500,000 gounds refined copper during the calendaryear compared with 22,252,348 pound. tast year and \$2517.014 posteds in 1910 Par the first seven months of this year the output was tree per cent less that in the corresponding period a year ago.
