## HAS COLONIZATION PLAN

Party Here Investigating Lands With a View to Locating People on Our Farms.

A party is here today investigating Anderson county with a view to starting a colonization plan. His idea is to take over a large acreage and cut it up into forty or fifty acre tracts, clear most of the land, fence it, build neat houses on the various tracts, and rent these sections or sell them on long time. The plan is practical, and is in keeping with the suggestions made repeatedly by the Herald. If handled in the right way the people can be located on such home places without any trouble, and the promoter can make a good profit on his investment. This scheme should be worked by our home people. Anderson county has thousands of acres of land that could be settled in this way, increasing the value of the lands, and at the same time be building up the trade of the city and county.
