

MONEY IN IRRIGATION

Our properties are located in the Columbia Valley between Wallula and Pasco—the lowest elevation of any irrigated lands in the State of Washington and are especially adapted to raising alfalfa, vegetables, fruits of all kinds, berries, grapes and figs. They produce the earliest berries and vegetables in the Northwest. These properties are now abundantly watered and lands with perpetual water rights are on sale at reasonable prices and liberal terms to induce early settlers.

THE NEW TOWN OF ATTALIA lies in the center of this most fertile district and is at the junction of three railroads, the N. P., the Washington & Columbia River, and the O. R. & N. Besides these unexcelled railroad shipping facilities, the Columbia River, lies at our door. Attalia is most beautifully situated and splendid business opportunities are offered.

The Company will sell choice lots at very low prices to persons who will erect homes and business houses in this thriving, coming town.

ARE
YOU
DEAF?

ANY
HEAD
NOISES?

ALL CASES OF
DEAFNESS OR HARD HEARING
ARE NOW CURABLE

by our new invention. Only those born deaf are incurable.

HEAD NOISES CEASE IMMEDIATELY.

F. A. WERMAN, OF BALTIMORE, SAYS:

Baltimore, Md., March 30, 1907.
Gentlemen:—Being entirely cured of deafness, thanks to your treatment, I will now give you a full history of my case, to be used at your discretion.
About five years ago my right ear began to ring, and this kept on getting worse, until I lost my hearing in this ear entirely.
I underwent a treatment for catarrh, for three months, without any success, consulted a number of physicians, among others, the most eminent ear specialist of this city, who told me that only an operation could help me, and even that only temporarily, that the head noises would then cease, but the hearing in the affected ear would be lost forever.
I then saw your advertisement in a New York paper, and ordered your treatment. After I had used it only a few days according to your directions, the noises ceased, and to-day, after five weeks, my hearing in the diseased ear has been entirely restored. I thank you heartily and beg to remain
Very truly yours,
F. A. WERMAN, 720 S. Broadway, Baltimore, Md.

Our treatment does not interfere with your usual occupation.
Examination and advice free. **YOU CAN CURE YOURSELF AT HOME** at a nominal cost.

FRUIT INDUSTRY GROWS STEADILY

Fifth Biennial Report Shows Orchards Are in Good Condition

The fifth biennial report of the state board of horticultural inspection, which has just been issued, contains the statement by President H. P. Ustick that "so far as we have been able to gather, the number of cars of fresh fruit shipped, have been 2,003. This has resulted in a revenue of \$1,121,680. Considerable fruit has been evaporated, but we have been unable to learn the amount."

Commenting upon the general fruit growing conditions of Idaho, State Horticultural Inspector A. F. Hitt says in part:

Orchards Remarkably Clean.

"New methods of combatting dangerous insect pests and diseases have been tried with a great degree of success in most cases. According to the number of acres of bearing orchard there has been more clean sound fruit raised and marketed this year than ever before, still there is room for improvement, and we expect to, and should improve from year to year. No cause ever prospered when at a stand still. The prize is only obtained by push and energy."

"I have personally inspected most of the nurseries in the state and with few exceptions find them in excellent condition. Quite an amount of old infested and diseased nursery stock has been condemned and destroyed. I have personally inspected many orchards and many jobs of spraying done for the different insect pests, also many of the packing houses."

Praise for Deputy Inspectors.

"The work done by the deputy inspectors is to be highly commended. It has been done in a manner that shows their ability to accomplish good results."

In his tabulated report showing the work done by the district deputies, he says that William Mohl, in this district, visited and inspected 1,837 orchards, 5,300 acres and traveled 2,525 miles. Mr. Hitt adds further on:

"A close estimate of the entire acreage of orchards in the state as reported by the deputy inspectors is 47,869 acres. Of this amount there was 6,870 acres planted in 1905 and 1906."

"Number of acres reported inspected 30,585, leaving 17,284 acres as not inspected."

"In addition to the above there are at least 250 acres of berries in the state. The greatest area planted to new orchard as reported, comes from Nez Perce, Idaho, Ada, Elmore and Cassia counties."

Fruit Raising Growing Industry.

"In conclusion will say that great progress has been made in the raising of good clean fruit and in the marketing of the same."

"Fruit raising has become one of the great industries of our state and will continue to grow and expand with other industries."

"Now is the time to foster and encourage the growth of fine fruit and those who enter into the business, if proper methods are employed, will reap a rich harvest."

TRANSFER BODY OF LEO XIII

Remains to Rest in Niche
In Church of St. John
Lateran

ROME, Jan. 12.—Though the Vatican authorities have taken the greatest pains to prevent the matter being made public, it is learned from a reliable source that the coming week will probably witness the transfer of the body of Pope Leo XIII. from the Church of St. Peter, in which it has lain over three years, to its final resting place in the Church of St. John Lateran.

As nearly all the cardinals now in Rome were created by the late pope, it is probable that all of them will take part in the ceremonies, which will be held at night and be strictly private.

Do Not Anticipate Disorders.

Just why such extreme precautions should be taken by the church it is difficult to understand.

At the present day there is no possi-

bility that the disorders which attended the removal of the body of Pope Pius IX. to its last resting place could be repeated.

It is known that the Italian government offered to co-operate with the Vatican by lining the entire route with soldiers and police.

Everything is in Readiness.

Meanwhile everything has been placed in readiness at the Church of St. John Lateran to receive the remains. The final resting place was chosen by the late pope himself.

Shortly before he was taken with his last illness the pontiff expressed to Cardinal Satolli his desire to be buried in the historic church. The spot he designated is on the left of the apse above the entrance to the sacristy, corresponding to the opposite niche in which is the monument erected in 1891 to Pope Innocent III.

A magnificent monument to mark the site has been completed by Tadolin, the famous sculptor.

Monument is Magnificent.

The artist has reproduced not only the features of the late pontiff, but also his characteristic expression.

Leo XIII. is represented standing. His hand is outstretched in an attitude of benediction. At his feet there are two figures, on the right a woman representing religion and on the left a man who is at once a toiler and a pilgrim.

In all respects save the monument the tomb is to be a counterpart of that of Innocent III., consisting of a sarcophagus with a bas relief, two niches, two statues, and two medallions.

THIS DATE IN HISTORY.
January 12.

1806—Vienna evacuated by the French.

1813—William Jones of Pennsylvania became secretary of the navy.

1840—Francis Coppee, French poet, born.

1876—Jack London, author, born.

1883—Clark Mills, sculptor, died. Born December 1, 1815.

1897—National monetary conference met at Indianapolis.

1900—Chicago drainage canal opened.

1905—Five killed in railroad collision near Ripon, N. M.
