A NEW ROAD.

REASONS WHY IT OUGHT TO BE CHANGED.

A Winter Road can be had by Way of Georgetown Canyon at Small Expense.

The road as it now runs to Star valley from Montpelier is an eye sore both to the travelers and the county treasury. At present it is impassable except for light sleighs.

This week D. H. Rowley, who is in business at Fairview, came over from there and in conversation with the EXAMINER scribe we learned the following:

The Star valley road for several months is impassable to heavily loaded teams.

That it will always be a constant drain on the county treasury every spring for repairs.

That the people of Star valley are looking about with a view to get a road via of the Cariboo mines to the railway.

That unless the people from this side assist towards opening a better highway they will lose much of the Star valley trade. That a splendid road with light grades and passable at all times of the year can be had by way of Georgetown canyon. That the proposed road will cut off at least ten miles of the present distance. That it can be built for a very small amount and that the people of the other side will assist in putting it through.

This much having been ascertained from him the EXAMINER set out to learn the feasibility of the Georgetown route. Commissioner Hoff was found and, as he knew every foot of the country through which the proposed road was to run, he gave us the following points:

The road from Montpelier to Georgetown is extensively traveled at all times as is also the road from there to a point five miles up the canyon. From the other side the people have a good wood road this way for several miles up a canyon, whose head is opposite the canyon on this side, leaving about ten or twelve miles to be built.

The canyons on both sides are wide and there is only one divide to cross instead of three as the road now runs. There is plenty of timber near at hand to build the few small bridges necessary, and very few dugways will be needed and these are small ones. Most of the work for the new road will consist of clearing falling timber. The road when completed will have no hard pulls for loaded teams and the snow does not drift in that section.

All these points are in favor of the proposed new road.

Mr. Hoff stated that he would in early spring look over the line and make an estimate of the cost. He also stated that the Georgetown people would contribute considerably in work for this road in order to have a timber road farther up the canyon than the one now used extends.

We have given the facts as we learned them. Unless the matter is taken up Montpelier is in a fair way to lose part of its large trade from Star valley, and we think the merchants of this city ought to give the matter their attention. When once completed the road would need only such repairs as the district road tax could easily furnish.

What say you?

Chas. Manassa Dend. Chas. Manassa, who was shot by Andy McIlwain in this city Jan. 18th, died at Pocatello last Tuesday morning of blood poison.

Mr. Manassa was born in Michigan about 36 years ago. He went to Kansas where he was married some seven years ago. A little later he came to Montpelier where until a few days ago he resided. He was at one time city marshal of Montpelier.

The deceased leaves a wife and two children to whom the heartfelt sympathy of the community is extended. The unfortunate occurrence which caused his death is deeply deplored by all, for Charlie had a great many friends as also had Andy McIlwain.

The funeral took place at Pocatello yesterday, being conducted by Rev. Vander Donckt.

It is believed that McIlwain will now be brought back and tried for murder at the August term of court.

Since writing the above we learn from Dr. Hoover that a post mortem examination was made on Manassa and the remarkable fact was developed that the bullet had lodged in a bone at the base of the skull, to remove which it was necessary to take out the entire brain. The bullet had fractured the upper jawbone and had completely severed, at its point of leaving the skull, the pneumogastric nerve, which nerve exerts the greatest influence upon all the organs of the chest and abdomen. Such an injury is absolutely fatal, by its interference with the process of nutrition. The cutting of this nerve, so to speak, stopped all working of the lungs and bowels and how he lived more than a day or two is a mystery. Therefore it is clear that Chas. Manassa did not die of blood poisoning as above stated.

Two Lives Saved. Mrs. Phoebe Thomas, of Junction City, Ill., was told by her doctors she had Consumption and that there was no hope for her, but two bottles of Dr. King's New Discovery completely cured her and she says it saved her life. Mr. Thos. Eggers, 139 Florida St. San Francisco suffered from a dreadful cold, approaching Consumption, tried without result everything else then bought one bottle of Dr. King's New Discovery and in two weeks was cured. He is naturally thankful. It is such results, on which these are samples, that prove the wonderful efficacy of this medicine for Coughs and Colds. Free trial bottles at Ritter Bros. Drug Co. Montpelier.

Old People. Old people who require medicine to regulate the bowels and kidneys will find the true remedy in Electric Bitters. This medicine does not stimulate and contains no whisky nor other intoxicants, but acts as a tonic and alterative, and mildly cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by Ritter Bros. Drug Co. Montpelier.

Chas. Schmid, Montpelier's tailor, will henceforth make to order suits from \$16 to \$75. These are cash rates, so don't ask for credit. Quality of goods and fit guaranteed the best. 34-1f
