ANNOUNCEMENT.

Next week the EXAMINER will be enlarged to an eight page 6-column quarto. The added pages will contain the week's telegraphic news, Idaho, Utah and Northwestern items, an agricultural column, Mormon church news, and miscellany. A continued story by one of the best writers will also be published.

It will now no longer be necessary for our subscribers to take two or three papers. The new edition of the EXAMINER will contain practically all that will be news, no matter of what nature you desire. See a copy and be convinced that it is the best weekly published in Idaho. We bar none, and the price will be the same, \$2 per year, \$1 for six months.

The new EXAMINER will be a daisy and no mistake. Now is the time to subscribe and get the benefit of all the news.

"Doctor" Manz writes the EXAMINER that he will be in town shortly and make it "hot for you for slander." All right; come on, Doc.

It was not necessary to import a lawyer to prosecute Meeks. John Bagley assisted the district attorney, and he did the business up brown.

Judge Standrod was asked to pass on the constitutionality of the gambling law last Saturday. But he declined until a case came before him regularly.

Evanston has a real big sensation. A young lady died there last week and a doctor and a certain young man are under arrest pending the coroner's investigation. All the parties concerned stand high in Evanston's society.

Paris has \$300 to pay salaries and improve its streets with and pay general expenses the first year of its existence as a city. No wonder the Post kicked. There won't be enough to pay for the publication of the ordinances after the officers get their portion.

On the first page the EXAMINER mentions the Hogensen case. We understand since writing that article, that there was no evidence against Hogensen and Judge Standrod ordered the case dismissed. We are glad to make the correction, for many people had gotten a different opinion of the matter.

A breach of promise case is to be tried this week at Evanston. How much is claimed as damages is not stated, but it's cartwheels to carrots that the jury will think there is a breach in the plaintiff's skull and allow the young man to go hence with his experience and what other satisfaction he can get.

That "scintilla evidence" against Meeks amounted to enough to call for a thirty-five year sentence, while the "cinch" against Tunks was so weak, that the judge regretted he could not give him a month instead of a year; and in one case Tunks was acquitted. In which case have the people been burdened with "excessive and unnecessary expense," apparently? The Post was simply mistaken.

It now transpires that Ike Tunks was never on the platted road with his fence. This was shown last week by the county surveyor. The EXAMINER hopes Ike will make the parties suffer who have been persecuting him, at the people's expense, for the last half dozen years. Mr. Tunks is probably not an angel, but he is a lot better citizen than some of those who have been holding him up as a first grade criminal.

Up in Boise there is not a state statute of any consequence that the people fear as a result of Judge Stewart's recent decisions. People will watch with interest the movements of a state without any laws that will stand fire in the courts. Something will have to be done quickly or the results may be disastrous to the state. Most of the people will follow the even tenor of their way, but there are lawless characters who will take every advantage offered and for these there ought to be some "good laws," no matter what they cost.

WHERE WILL IT END?

Judge Stewart, at Boise, decided the other day that the law allowing appeals from county commissioners' actions was void. In this he followed the supreme court ruling on the fee bill. This law was passed in 1896. Thus do the statutes tumble. Cases will now be brought in the interest of those men in the penitentiary who have been tried and convicted on information instead of by grand jury indictment. If this law is void, then every man sent to the penitentiary during the last six years will be free, for the state cannot appeal in a criminal suit to the supreme court. The Governor had better look the matter up and think about calling that special session of the legislature. If Judge Stewart, and perhaps other judges, too, get a chance, they will nullify

every statute on our state law books, and the people will be powerless to defend themselves.

If you don't believe J. J. Jensen can make hair grow on bald heads just see some of those he has been treating. Dandruff and all scalp diseases permanently cured by a new remedy. Price reasonable. 28

Mortgage Companies and Law.

The manager of the Deming Investment company declares that the mortgage companies doing business in Idaho are "being stood up in line to be shot at" because they have been caught violating the law and have been brought into court to meet the penalties thereof. The facts in the case are that the territorial law passed in 1887 to prevent usury prescribes that the charging of compound interest is expressly forbidden and imposes on the lender as a penalty the loss of the entire interest on the loan, one tenth of which shall go into the school fund of the county in which the offense occurs. The Deming Investment Co. and it is said all other mortgage companies doing business in this state except the Hypotheek bank, have used a coupon note requiring the borrower to pay interest on all interest not paid when due, which the courts have recently held to be in plain violation of the usury statute. Suits are now being brought to enforce the terms of the law and it is the probability of having to meet the requirements of the law that moves the mortgage companies to demur that they are being "shot at." And in view of the other side of the case, it is a soothing hope that those shots will be successful and that these companies may be required to experience the same inexorable law that they have heretofore invoked to the fullest extent against their unfortunate debtors.—Lewiston Tribune.

Frank Nye, of Paris, leaves to-morrow night for California where he has been called on a mission.

No More Japs.

The last Jap strike was the straw that broke the camel's back, so far as the Short Line is concerned. Sunday a large number of Italians were unloaded at Pocatello, and Monday they were distributed along the line west of there, taking the place of the Japs. Other sections will be supplied with American labor, if it can be had, and in a very short time the Jap will be no more on the railway sections of this company. The company is doing a great amount of work on its roadbed this year, and it could not afford to be having strikes on its hands continually. The contractors will lose their little rake offs hereafter.

Farmer William T. Baker has made \$350,000.

Farmer D. R. Francis made \$300,000.

Farmer George B. French has made \$200,000.

Farmer J. Pierpont Morgan has made \$1,000,000.

There will be great doings at the county fairs this fall.—Ex.

Some people may not know it, but all of the above mentioned are millionaire speculators, and probably never had hold of a plow handle in their lives. Their month's "earnings" have been made by gambling in the wheat pits of New York and Chicago, while the real producers have been toiling in the fields in the hot sun, trying to stave off a mortgage. The speculators generally get away with all the farmer makes or produces.

Any Old Place.

A letter was recently sent to Star valley addressed thus:

"Miss Mary —

Star Valley, Wyo.

Auburn or Afton or Fairview. Don't know which."

On the end of the envelope was the following:

"Please find owner and return if not called for in 5 days to Minnie —. Somewhere in Wyoming."

More than likely the young lady addressed will get her letter even if it is sent to all of the above post-offices.

Selling Out.

S. A. Mills offers his entire stock at cost and many items at less than cost to close out his store. There are many snaps to be had. Come and get our bargains and save money by buying before they are all gone. S. A. Mills. 28

We understand the people of Star valley have taken steps to push the road from Fairview to the Georgetown divide to completion. Teams and men are to be put to work as soon as the fall crops are out of the way and the road will be rushed through. However, all the people from that section say that they will still continue to trade at Montpelier, as it has the largest and best stocked stores in the country.

The premium list of the Idaho Inter-mountain Fair at Boise will be out shortly. It has been prepared and is now being arranged for publication. One interesting feature of it is a prize of \$50 for the best general exhibit of farm products, including fruit, grown upon a single place.

A Missouri exchange gets off like this: If there is anything that gives us a longing for eternal rest and sleep, damp solitude, it is a man who comes to a town or country and build up a good paying business, grows rich from the resources of a prosperous country and then squats down on his wealth like a clucking hen on a door knob and is too infernal stingy to even let the gravel grind in his own gizzard.
