# Seeger-Bundlie's COAT SALE

We have two dozen ladies' coats, all fresh stock, and right up to the minute in style, that are going to be sold rapidly. We shall not try to buy more this season, and we could not replace them if we did, so we are going to close the year with that part of our stock absolutely cleaned up. These coats are all well made and have the nifty appearance about the belt at the back that goes with quality and style. Some of them are fine plush trimmed with fur, and all of them are beauties.

Our misses and children's coats are equal in style and finish to the ladies' sizes, and when mother and child appear in coats selected from our stock, they will be well dressed and will have that ease and confidence that go with correct attire.

To go with these coats we have beautiful silk, serge and Jersey dresses that are good to look at and a pleasure to wear. When you see them you will know that we bought well, and you will know why we recommend them so highly to our customers. They will give satisfaction and you will not be wishing you had something else. We absolutely guarantee our goods, and it would be little satisfaction to conduct a merchandising business if we could not. We mean just what we say when we state that it is a pleasure for us to show you these goods, and we believe you will share that pleasure when you see them.

And Now Comes the Dessert, for We Have Saved the Best for the Last. There is a Very Material and Satisfying Reduction in the Prices of These Goods.

When an entire stock of garments is priced, allowance is made for some of them being left over and not selling at all. In this case they have moved so promptly and we are so sure of selling them all, we can afford to make the price low on the last ones, and we are doing it. You will know when you see them.

Our store is a busy place these days, but not too busy to give our personal attention to each customer until he or she has made selection and been fitted with just the right thing. We are as much interested in that as are our customers, and we are proving it to them every day.
