Good Jokes

REAL DANGEROUS.

The stranger in the public playgrounds noticed that the little boys were giving the little girls a wide berth on this particular morning. "That's queer," he mused. "Say. sonny, I thought you little boys and girls played together?" "We do some times," enlightened the youngster on the sandpile, "but not today." "And why not?" "'Cause it is as much as we can do to keep out of their way. They are playing suffragettes and making believe we are policemen."

Given by Mistake.

Disgusted Customer (who has brought back a watch he purchased from jeweler)-It was a disgrace for you to sell me a watch like that. It's absolutely impossible to make it go fast enough.

Jeweler (after examining the timepiece)-I most humbly beg your bardon, sir; you surely have good reason for being dissatisfied. I don't know how the mistake happened, but I find that I sold you a plumber's watch.

Under the Spell.

"About this time last night," said young Harlow, as he lighted a fresh cigarette, "I was sitting on a sofa beside a girl, telling her that she was the only one in all the world I had ever loved."

"And she believed it?" queried Dil-"Of course she did," answered Har-"Why, I believed it myself at

Not Sympathetic.

the time."

When I had told Mittens about the unhappy existence of his old friend, Mary Uotuseer, he gave not the slightindication of symathy, but snapped:

"It serves her right-it's the girl's own fault!"

'Why is it her fault?" I questioned. "It's her fault," he explained, "because she refused to grasp the opportunity I once gave her for marrying

Too Late.

Dobson-Were there no restaurants in Newville?

Dinwiddie-There were 10. Dobson-Then why did you have so much trouble getting a meal?

Dinwiddie-I arrived too late. Dobson-But you told me you arrived at 10 in the morning.

Dinwiddle-So I did; but that was too late; the sheriff had arrived the

USED THE PADDLE ON HIM.

INDUSTRIAL NOTES.

A school devoted exclusively to the study of motor boats has been started at New York.

The safest way to destroy black thereby dissolving the saltpeter.

A new boat, claimed by the inventor to be unsinkable, is made by covering a perforated steel shell with granulated cork. A species of stiff grass, which

grows abundantly in India, is used for sticks in the manufacture of matches in that country.

The exportation af aluminum of domestic production from the United States has increased tenfold in the last seven years.

The use of wall paper containing designs in vertical lines will make a room in which it is used look both larger and higher.

A patent has been granted for an attachment to rocking chairs to operate a fan to cool the occupants while swaying to and fro.

An Indiana farmer has patented a potato digger which loads the tubers into the wagon to which it is attached by an endless chain. For invalids' use a bedstead has

been invented in which the center of the head is made to swing out to form a head and shoulder rest. A Chinese has invented a simple

machine with which a person can make straw braid of fine quality 12 times as rapidly as by hand. Within the last two centuries about

fifty metals have been discovered by chemist explorers, but use has been found for only a few of them. As flax pulled from the ground yields a longer fiber than that reaped in the usual way, a Canadian clergy-

man has invented a pulling attachment for binders. The largest wooden structure in the world is the Parliament building in Wellington, New Zealand, timber being preferred to stone because of the

frequency of slight earthquakes. A Frenchman has invented a proc ess for distilling gutta percha from the leaves of the Malay tree of that brush. The brush works on the same name, saving the trees from the dam- principle as the pen. A hollow handle age caused by tapping the trunks for

A catch that will permit a window At the lower end of this handle is a to be locked open to any desired extent, yet which contains a fusible link connected with a weight to close the window in the event of excessive heat, is a recent invention.

A Californian has been granted a patent upon tongs for use in connection with a derrick in lifting heavy objects, the points of which carry wheels, locked automatically with ratchets when a load is raised.

READING LAMP IS IMPROVED

So Constructed That It Will Burn Gasoline, Kerosene or Equal Brilliancy.

What appears to be an improvement on the ordinary reading lamp has been designed by a Kansas man. It is so constructed that it will burn gasoline, kerosene, or alcohol with equal brilliancy, it is claimed, the only change each fuel. The wick can be turned up claims an explosion to be impossible. Any brilliancy up to 300 candlepower can be obtained with this lamp, but the light is shaded so that no direct rays enter the eyes. The lamp is said to cost less to operate than a common

Chimneyless Lamp.

oil burner, yet to give about 20 times the amount of light. There is no chimthe design is such that it can be dirt or disagreeable odors are said to is difficult to upset.

An Isle of Sulphur.

One of the most extraordinary islands in the world is located in the Bay of Plenty, New Zealand. The small bit of land is called White island, and consists mainly of sulphur, the latter mixed with gypsum and other minin circumference and rises about one put. thousand feet above the sea. The sulphur from White island is very pire and efforts have been made to obtain duce about twenty pounds of cloves a it for commercial use.

AUTO WRENCH VERY USEFUL

Handle Co Shaped That It is Especially Serviceable in Removing Tires From Wheel.

An automobile wrench of manifold ases has been designed by a New York nan. It can be used either on nuts or pipes and the handle is so shaped that it is especially serviceable in removing tires from the wheel rims or for providing good leverage in the innumerable things to be done around motor cars. In appearance the article resembles an ordinary monkey wrench and with the attachment off it is nothgunpowder is to throw it into water, ing more than that. The attachment,

Useful Auto Wrench.

however, consists of a sloping jaw pivoted to a loop which passes over the head of the wrench and holds the Jaw firmly in place, thus transforming the utensils into a tool by which a good grip may be obtained on a pipe or any other round object. The jaw attachment can be quickly adjusted or removed and the spring loop holds it as tight as if it was fixedly jointed to the tool. These wrenches are attractively made in nickled or mottled finish and come in individual cartons.

FOUNTAIN BRUSH IS LATEST

Works on Same Principle as Pen-Handle Acts as Reservoir for Ink or Paint.

Everybody has heard of the fountain pen and knows the principle on which surprised to see it come back so it works, but it has remained for a Michigan man to invent a fountain acts as a reservoir for the marking fluid-paint, ink or whatever it may be.

Fountain Brush. required being a different nozzle for cylindrical opening into which the brush is inserted, the upper end of the and down, but there is no danger of brush closing the inside end of this turning it too high or too low, and its chamber and the liquid flowing down chief feature is that the inventor through a spring operated valve and filling the lower part of the chamber, which tapers to an opening just large enough for the tip of the brush to pass through. A coiled tube admits air to this chamber.

FIBER-MADE PACKING BOXES

Scarcity of Wood Creates Demand for Substitute in Manufacture of Receptacles.

As wood grows scarcer and higher in price the demand for a substitute in the manufacture of packing boxes grows more and more insistent. In this connection there has been recently brought out a partially made box of fiber, with some interesting fea-tures. As they are shipped to the consumer the boxes are folded flat, cut in such shape as to render them easily set up. The two ends of the fiber are securely riveted together and the fiber is creased to permit fold ing into box shape. The cases are secured in shape with gummed strips, the strips being furnished with the cases, cut to the required size. The point is made that the gummed strips securely seal the case so that there is no chance for "concealed losses." It ey to break and no wick to trim and is possible for wooden shipping cases to be pried open in transit, some of quickly and easily cleaned. All smoke, the contents taken out and then nailed up again so that they are apparently be eliminated, and as the center of in good condition at transfer points gravity is below the handle the lamp or when reaching destination. This cannot be done with the fiber case, A saving is claimed for them in first cost, shipping weight, storage space and efficiency.
