TAKE N FIGE.

Many and just objections are made to all the ordinary Liciments of the day on account of their officiative andi, and the unsightly stains oriented to the aktor. A wonder in fact which has been versified to the astonizhment of the most profound chemists, and the delight of fatilities patients is that in addition to its autoristic correlative elects, it is the most healthful connecte and agreeable performe. To any part of the skin to which it may be applied it imparts a rosy and natural glow which laste for many hours, and leaves the volvety softness of healthy ak n. instead of the eractic and class need appearance which is a nours, and leaves the volvery soluens of healthy as n, in-stead of the evactor and chapter appearance which is a common result of almost all other articles used for that purpose. Hence, every lady's tollet is supplied with it who knows its excellent qualities in this respect. To ne-alize its agreeable odor you need but open one buttle and try for you welf.

Mr. J. B. Vendersmith:

Hear Sit:—I have been afflicted for three years with rheumation in my back, and for the lest six months not able to get out of my bed without help, and your agent in our city insisted on my trying one bottle of Chvng Flau Lanineut and try what effect it would have; and one bit the has relieved me so much that I was able to get out of my bed without difficulty. It has been a heasing to he; a just try it for yourse f, and you will be well pleased.

Ambrotypes.

The subscriber now offers to the public a new style of picture, far aspector to the Bagaerreotype, made in wheeling duly at his establ shorted.

AMBROTYPES, the process for which is patented in the United States, Great livitain and France These pictures are the most beauth at and truthful ever produced by the Photographic art. The exceeding flueness, depth of light and shade, and richness of tone is wonderful. They do not reverse the rubject, but represent everything in its true position.—They are without the glare of a daguerreotype, may be seen in any view, and will last for ages unchanged, being IMPERISHABLE, hence the name, Ambrotype, which signifies Indestructibility. The picture is taken on piain gass, to which another plate of corresponding size is secured with an indestructine cement by which he picture will retain its original bi-lihancy for ages, it will not corrode by acids nor, be highered by water or climate.

Anthotype Tereoscopes must be seen to be appreciated the relef is as peried as lie.

Baguerreotypes taken at reduced prices Ladles and gentleann are invited to call at dexamine my gallery.
