

## Crop Report a Disappointment

Stocks Recede Quickly and Lose Practically All the Gains Made in the Day.

NEW YORK, July 10.—Disappointment at the government crop report, which was issued shortly before the close of the market, caused stocks to recede quickly, after a display of all-around uniform strength from the opening. The losses thus sustained virtually cancelled the gains of 1 to 2 points through the list of the active stocks. The character of the crop report was of some extent by the monthly statement of the copper producers and of the United States Steel Corporation's unfilled orders, which were unexpectedly favorable. United States Steel and the copper shares, however, yielded with the remainder of the list at the close.

The figures for spring wheat and corn were the most discouraging features of the government's statement. Previous estimates of the condition of spring wheat were usually about 76 or 77, in place of the government's figure of 73.8. The condition of corn was two points under many estimates. It was pointed out, however, that since July 1, the date to which the government report refers, the lack of rain, which was largely responsible for the damage, has been relieved in many sections, and that present conditions are substantially better than those of ten days ago, when the official figures were collected. The decline in stocks was due in part to the expectations of operators who had bought heavily in anticipation of a more bullish statement.

The increase of 247,000 tons in the unfilled orders of the United States Steel Corporation between June 1 and July 1 indicates an unexpectedly large amount of new business. The decrease of more than 8,500,000 pounds in copper stocks was larger than was looked for, bringing down the total to the lowest point in several months.

The bond market was firm. Total sales, par value, \$2,415,000. United States bonds were unchanged on call.
