—Geo. Klingle, is Christian at Work.

A GREAT "SCOOP."

How a Story Was Told Before Its Осощтепсе.

Some years ago while I was employed as a reporter for a leading New York dally paper, the rather curious incident herein recounted came to pass, but that was so long since it is doubtful if any of the readers of this journal remember its occurrence or the widespread ripple of comment thereby created at

Within the office of the newspaper alladed to, as in similar places everywhere, pleasant countenances smiles not infrequently concealed feel-lags of wounded sensibilities through some fancied unkind discrimination, and occasionally pent-up jeulousles gave way to bursts of anger and torrents of vigorous though unpolished language. Something of this sort, I have long since concluded, initially led to the tiff between Angelo Romeri, a talented though vindictive young Italian ,and myself.

Romeri had been doing criminal as signments, a kind of work in which he may be said to have fairly reveled, but his style or manner of writing up trials. etc., provoked unfavorable criticism and rendered the young man unpopular; whereupon the city editor transferred him to another department, and gave the criminal work to me. Romeri and "Why, this is --" I was going to say I had been the best of friends, but diand positively "offish" is his behavior tentment?" toward me.

At the period of which I am speaking those wealthy profligates nearly always wings in that metropolis, creating a night. But my dear sir," exclaimed the great talk for a brief season, and then speaker, unexpectedly seizing my hand, the reader familiarly, but I shall designate him simply as Mr. Bascom. The that of a real person, but I shall let it go at that.

traveling the road of life at a wonderfully rapid pace. Possessing, as he did, what us young fellows called "slathers" de him famous in any community, he had, in addition thereto, a good Half a dozen aristocratic clubs felt honored in having his name enrolled on their books. Many were the swell receptions and balls given in those days at his palatial home opposite the Palisades, and overlooking the broad, picturesque Hudson, near Tarry-Nothing bounded his hospitality, and an accomplished wife, aided by a score of select and well-drilled sorrcontributed to make his home the abode of perennial enjoyment. Bas-com himself, however, spent by far the greater portion of his time in the society of gambiers and their side partners the city, carousing constantly, to that no special gift of prescience was needed to foresee that his career inevitably must end in sudden death or in-

It was on a certain bright June morn ing aucceeding a tempestuous night that I sat reading a daily paper on one of New York's big ferry boats coming up the bay from Staten Island, when two came and took seats near mine. They were talking about a vessel that was reported aground off Sandy Hook. I made a note of the substance of their conversation, and upon reaching the office naturally mentioned what I had The word was passed eri, whereupon that gentleman posted off to the telegraph office for informahour that the ramor was totally lacking view to causing him unnecessary view. trouble, though I was innocent of inentionally misleading him.

aix or eight minutes behind schedule time, but the pause was sufficient to allow a stont, pleasant-faced gentleman to get aboard. The newcomer entered the coach occupied by myself and a couple of dozen sleepy heads, and perceiving that I was about the only person awake, he came and at the coach occupied by myself and a couple of dozen sleepy heads, and perceiving that I was about the only person awake, he came and at the coach occupied by myself and a couple of dozen sleepy heads, and perceiving that I was about the only person awake, he came and at the tragedy should be handled long enough to question the probability of its correctness. Pahaw! I thought, what grounds had I for doubting my substantially correct, and closed by commending its enterprise to an imparfact that its original published report of the sensation, barring a few trivial errors, such as fixing the hour at half pest two o'clock, and substituting a pistol for a razor, was commending its enterprise to an imparfact that its original published report of the sensation, barring a few trivial errors, such as fixing the hour at half pest two o'clock, and substituting a pistol for a razor, was only person awake. voice and leaning toward me, "that being the case, I don't mind telling you shouldn't like to have get out. You've probably heard of Fred-Bascom?"

well. You mean P. G. Bascom, the big

real estate man?" "Yes, and owner of the largest hotel on the coast of Maine, and also of the Baseom block, and thirty or forty tenement houses in New York. I am related to him, and have just left his house. What would you think if I told you he committed suicide this evening?"

"What?" I exclaimed, with unfelguastonishment, "do you mean to say Bas-com has taken his own life?"

"Yes, yes-it is only too true," my companion replied, as he shokingly reressed a sob, and began fumbling about for a pocket-handkerchief. am dazed as yet, and scarcely know what I am doing. As I was saying, I am his nephew, and have just left the grief-stricken family to go for an undertaker."

"When did this occur?" I inquired, in the regular professional way, mo mentarily forgetting myself, and making a movement toward my note-book. The gentleman observed the abortive pass at my inside cost pocket, whereat a pained expression came into his face. I saw the mischief I had done, but quickly reassured him by making anothe dive at another pocket, this time fetching a cigar. I had squared myself, and he continued:

"Fred came in at half-past ten night, looking as well as usual. He apoke very few words to anyone, but went immediately to his sleeping aparts supper for the crowd. My story of the ment. Locking the door and taking a loaded pistol from the drawer of his pronounced a hoax of the first magnibook case he shot himself in the right temple, spattering his brains all over the mirror of a dresser, against which Bascom in the flesh since one o'clock, he fell. Oh, sir, the sight when we

pleted, and, with fisming headings,

spatched to the composing room. Il was a big night's work, and I felt proud of the achievement. Conscious of having made the grandest "scoop" of the day, the little failure at Sing Sing, by comparison, cut no figure at clashed with an ingrained regard for all. My superiors evinced their appreciation by according me gracious treatdetermine which should have ment, and I realized that, for once in

The forms went to press after three o'clock, and by four o'clock I had re- selopment. These spores germinate in ceived copies of the paper, and sauntered over to Doe's place to enjoy the "Well, then," he said, lowering his laxury of being regarded as a deep one- the end displace them, preserving the as a man who is "away up" in his profession. Some of the boys from all the something, but it is a secret that I principal offices were sure to be there, falling to the ground or upon flowers. and I wanted to give them the pleasure again germinate and produce the funof gazing upon the hero of the hour in | gen. "Heard of him? Why, I know him person. On the way over I tiptoed eased seed, but is entirely a fungus wonderful feat should do.

greetings with the proprietor and then autumn, or more usually until spring, proceeded apstairs. Fumes of tobacco germinates in the damp ground and filled the room, and a host of reporters were there, as usual. The crowd appeared to be larger than custom-grasses and thus completes the cycleary, and everybody was talking at the same time. My appearance occasioned on different grasses, but the results from ation. But immediately following the ominous pause came abouts of laughter ought not to have told you this, but I and derisive hoots from twenty Bulemian throats.

"Bravo!" "Fire him out!" "How about the 'awe-stricken serv-

ants!"

"Oh, what a secop!" These are samples of the contemptuus epithets showered like coals of fire upon me till my face burned with shame. When they had made themselves hourse with their noises, a mock court of lunatico de inquirendo was organized and I was tried, not for in-

sanity, but for rank imbecility. The tribunal so far exceeded its powers as to also hear another charge against me -that of committing an offense against truth. On both counts I was adjudged guilty and sentenced, amid supper for the crowd. My story of the suicide, it soon appeared, had been tude, for at least three members of the assembly had seen and apoken to Mr. an hour and a half after he should have shot himself, according to my state-ment. At one o'clock he left a wellknown club house in the company of a newspaper man and another friend, and started for his home on the Hudson, intending to go by the regular express train leaving the city at one twenty-six a. m.

The reader, unless he has done newspaper work himself, cannot conceive the depths of my mortification and mental anguish at being guyed to death by friends and foca. The boys poked fun at me till I had stood treat all round several times before they even began to tire. My enemy, Romeri, was present and, though he was undemonstrative, his face wore one of the completely self-satisfied and diabolical smiles I ever beheld. I could have torn him to pieces for that infernal smile, for it was more galling to my lacerated sensibilities than the combined jibes of all the company. Suspicion pointed to him as the man of all men who most likely would condescend to "put up a job" of that kind on me, as a retaliatory measure for the mistake I made in reference to the vessel being ashore. The worst and most enduring feature of the whole affair, however, was the knowledge that the blunder would, as surely as Judd Farmer. dignified bearing, a combination which, ranging another compromise between that the blunder would, as curely as dignified bearing, a combination which, ranging another compromise between the sun rose in the morning, cause me despite his frequent and wild debauches, greed and conscience. While atrugon the eve of the dull season,

Seeking the seclusion of my own room at the hotel later on I tried to sleep and forget the matter, but between my mortification and rage rest was out of the question. I could do nothing for four or five hours but blush, smoke my pipe and walk the floor. At the mitted the value of it, but none of them ten o'clock in the morning I nerved my had done it, the excuse being that it self up to go on the street, though I must say a mighty effort was required so to do. Once outside, and finding the world moving along in its accustomed course, oblivious alike of my presence traces of a smile on my companion's or my abscuce. I felt somewhat recountenance. Assuredly I must have lieved. I had brought myself to imbeen mistaken, for clasping his hands agine that out on the street every together, the gentleman fervently ex- one would point to me with the finger of scorn.

In the vicinity of Broadway and Nasthere existed room for doubting it. I sau and Chatham streets the newsboys ran yelling: "Extra papers!" "All about the suicide!" till curiosity impelled me to buy several copies. Even the paper on which I was employed evidently remained in a state of revolver. Immediately I summoned obfuscation as to the truth, for the lads were crying extras from our office. This thing, I thought to myself with a shudder, is going too far. The best thing, perhaps, for me to do is to skip out of town at once and forever.

Stepping aside and standing in a hall doorway, hastily I scanned the re-

FARM AND GARDEN.

ERGOT AND ERGOTISM. Pay Terrible Disease Preduced by Pengus

-Pupular Remedies. Ergot affecting forage crops such as wild rye, red top, timethy, etc., causing great distress at times among farm animals, begins by the germination of spores of a fungus, which have been carried by wind, or other means, to the flowers of grasses favorable to their decontact with the outer surface of the newly-forming aceds, penetrate and in original form, and later bearing spore which perform the office of seeds, and Therefore, ergot is not a disalong, as one who has accomplished a growth, developing below the young seed and preventing its formation Reaching Doc's place I tarried a is the dormant form of the fungus, moment in the bar-room to exchange which remaining in this condition until grasses and thus completes the cycle. The fungus has a different appearance a profound hush throughout the depart- animals eating it are the same. In the ment, which surprised me not in the Illustration, 1 is a head of orchard least, for I felt entitled to rare consider- grass, 2, of timothy, 3, of wild rye, and

s, of red top, each of which is affected by ergot as is shown by the black growths where seeds ought to be. The results of feeding hay affected by ergot disease are frequently disastrous. skin of the animal becomes red and itching in spots, the hair falls off and repulsive sores appear. In cattle, hogs and sheep, the sores more somm appear on the legs and feet. The ankles swell, suppurate, the bones become diseased, and flually the lower joints drop off. This continues until the animal is destroyed, affecting first one, and then by degrees all the limbs. It is a terrible disease, and has been known in the old world for several cen-

turies. Of the multitude of remedies tried, only two have proved of any value: 1. Poultices of sonp, rye-meal and salt to the legs and feet. 2. A wash of beef brine, composed of saltpetre and common salt applied several times a day, and afterward washing and rubbing the feet with bittersweet ointment. After the disease is well advanced, treatment is useless. When the first signs of the disorder appear, make an entire change of food, feeding that of good quality, nutritious and free from ergot. Administer a dose of physic, keep animals warm and give plenty of water. Ergotism will probably not ap pear if the hay is cut before the seeds formed. Green cut hay is easily digestible and readily eaten.-Orange

TESTING THE COWS.

Their Productiveness. D. W. Willson writes to the Orange Judd Farmer: In conversation with some farmers about weeding out their poor cows, it was suggested that a record of their yield should be kept for guidance and information. All adwas too much trouble. That seems to be the bugbear with all dairymen, "too much work." They say we have enough to do now, getting up at four clock and working until seven or eight every day, without undertaking anything more. There is some reason in this, but is the labor intelligently done? The ordinary dairyman at all seasons can easily find time to test at least a portion of his cows to determine their ability to pay for their food. It is easy to have a spring scale and slate hanging in a convenient place in the stable, where it is but a moment's work to record each milking. Once started the interest will soon develop, and milking without weighing milk will not be thought of. Try it, dairy farmers, and see if it "don't pay." surely will.

Sheep That Don't Pay. There are many flocks of light shear ing native sheep that do not pay interest on the money invested in them, let slone paying for feed and trouble, which, bred to a heavy-fleeced Merino was a trick instituted by myself with a com," and then disappeared from my with suppressed emotion, eagerly I ram, and by a judicious selection of the drink the words. Here are telegrams from Tarrytown wired at up to shear a good sized fleece, as well entionally misleading him.

Some months elapsed and the vessel vanished. Quickly I got into a cab and ing minute particulars of Mr. Baseom's without going to the greater expense without going to the greater expense necessary to purchase a full flock of thoroughbreds; yet they are quite an improvement over their thin, lightfleeced progenitors, and this way of securing a flock of sheep is in most cases better suited to the farmer's

The Way to Success As a rule, if you want more money on stock, and this especially applies to the cows in the dairy, it must have the best of care, it must have food and water regularly, must be kept clean, and in every way made comfortable at all seasons of the year. If you cannot make up your mind to treat stock in this manner you can sell out and go into some other business.-Western Rural.

THE value of a food does not depend on its bulk. Chemists claim that a pound of cottonseed meal is equal, in autrition, to three pounds of eorn, or seven and a half pounds of bran. Acording to cost, therefore, it is much sheaper than any kind of grain.

At the Massachusetts station experi nents have been made with the soja bean as a allo plant. This bean grows somewhat like a pea vine. It is said to more closely resemble meat in its shemical analysis than any other MANGROF

Fixed just right MEMPHIS, TENN. -Liver, Stomach, and Bowels, by Dr. Pierce's Pleasant Pellets. They EWIS' 98 % LYE do it in just the right way, too-

POWDERED AND PERFURAD

(PAYNOTED)

The strongest and purest Lya
made. Unlike other Lye, the being
a fine powder and naewod in a can
with removable lid, the contents
are always ready for use. Will
make the best perfumed Hard
Soap in 20 minutes without both
ing, it is the best for cleaning
waste pipes, disinfecting sinks,
closets, washing bothes, paints,
trees, etc. PERMA, SALI M PS CO.
