DRAFTING LABOR,

Incident to the investigations going on in Wash ington these days, there is serious talk of conscripting labor for war work, particularly for the construction of our new merchant fleet. Several senators are known to favor action by congress corresponding to the conscription of men for the army. With the experience of the first eight months of the war to judge by, they say, the country cannot safely leave so vital a matter to the voluntary patriotism of labor,

It has been testified, in the shipping inquiry, that out of 186 shipbuilding plants no less than 30 have had to shut down, for varying periods, because of strikes since we entered the war. That has meant a of 20,000 men for a month. The unfortunate effect of is so imperative, is apparent to everyone.

ain for the "disloyal" spirit shown by many of her labor groups early in the war, but Sir Christopher Kent, an expert on British labor problems, says: "If Great Britain had one-eighth of the labor troubles which the United States has had since the commencement of the war in April, we would have been compelled to conclude a disgraceful peace with Germany long ago."

Under modern conditions, he adds, no nation can carry on war successfully unless there is industrial peace. That is self-evident, carry on war and somehow or other, we must insure such peace.

"I cannot see," says Sen. Sherman, "that there is any moral, legal or theoretical difference between the government compelling American citizens to shoulder a gua and compelling the labor of the country to work under discipline."

Nobody really wants to place American labor under such compulsion, but it may yet be done. For once, we would say, Sen, Sherman has an idea, even though he must have borrowed it.

NEWS FROM THE FRONT. By Ella Wheeler Wilcox.

Wait only for one thing-news from the front. The olden joys, and worries, hopes and cares, Aims and ambitions, which made up their days Are meaningless and empty. Nothing seems Of any import but the waited word From dear ones who have heard the country's call And answered it and left vast loneliness And hunger of the heart in silent homes. Bravely they do the things that must be done And make no protest; but, one wish alone Fills all their thoughts by day, their dreams by night-News from the front!

I, too, detached from all that life once meant, Perform my duties and pursue my tasks As cheerfully and as bravely as I can: While like dead leaves on bleak November winds Old aims, ambitions, interests and desires Blow by me. One who heard the call of God And answered it left such vast loneliness And hunger in my heart that now my life Has room for only one compelling wish, Which fills my thoughts by day, my dreams by night-News from the front!
