## CHRISTMAS TREE AT THE HOSPITAL

### All Patients, Nurses and Employees Receive Gifts—Fine Program.

Real Christmas spirit and cheer was given the patients of St. Joseph's hospital Christmas eve when, through the courtesy of the sisters in charge, a Christmas tree was one of the features.

Miss Rose Trion, a nurse at the institution, was attired as an angel and distributed the gifts to the various patients in their sickrooms. Christmas bags containing candy, nuts, grapes, oranges, apples and other "goodies" were given to each patient as a gift of the hospital, along with a large heart inscribed with "A Merry Christmas."

The program was an excellent one and consisted of Christmas music on the victrola. All the gifts to the sick, nurses and other employees of the hospital were brought to the tree and were distributed from there by Miss Trion. The tree is a large one, beautifully decorated with Christmas ornaments and electrically lighted.

All patients without exception greatly enjoyed their Christmas eve notwithstanding the fact that some of them were seriously ill.

## "FLU" TURNS TAHITI INTO CHARNEL PLACE

PAPEETE, Tahiti, Dec. 9.—Influenza has turned the island of Tahiti into a charnel place. At the rest of Papeete burn great pyres, with the stark, sheet-covered bodies of many natives waiting to throw into the glowing ashes of those who have been consumed by the flames.

The Associated Press correspondent has learned that fully one-seventh of the population of Papeete are dead.

Without the assistance of wireless the use of airplanes could never have been developed so fully as it now is. "Artillery observation" by airplane is among the most profitable of all the uses of aircraft.

Far below in the batteries the wireless operators receive the corrections from the airplanes. All the signal comes to indicate that the right range has been found and better, the "cease fire" signal to indicate that destruction has been accomplished.

The extended range of aircraft wireless leads to its use from airplanes on long reconnaissance, and the operator in the hut on the ground, miles behind the line, is the first to learn, perhaps of a new German howitzer emplacement, perhaps of the massing of troops intended to effect a surprise—a vain hope, thanks to the wireless.

"FLU" IN JAPAN. The epidemic of Spanish influenza has reached Japan and many schools have been closed in the large cities of the empire. There have been many deaths.
