## REED DECLARES LEAGUE SCHEME IS DANGEROUS

**Powers Granted the Executive  
Council Are Appalling,  
Stupendous and  
Dangerous.**

NEW YORK, Mar. 7.—Sen. Reed of Missouri, democrat, speaking before the Arts and Science association here last night, declared the American people had been either intentionally or ignorantly misled regarding the league of nations and urged that the proposed constitution be given careful study before its acceptance by the country. "The scheme is revolutionary and dangerous to the last degree," said Sen. Reed. "The powers granted to the executive council and which may be exercised by five men, are stupendous, dangerous and appalling. Their misuse might result in destruction of the liberty of the world—in the crushing of the American republic—in the creation of an international despotism worse than has ever cursed the earth or any single nation thereof."

Sen. Reed said any claim that the league would not destroy the Monroe doctrine was either "made in ignorance or is dishonestly made," he declared the world court as planned would embroil America in all world wars and political intrigue, destroy its sovereignty and compel service of its armed forces in all parts of the world.

### Fears for Republic.

"The acceptance by the United States of the proposed constitution of the league of nations may involve the very life of the republic," said Mr. Reed. "It is high time patriots should arouse themselves."

"An attempt is being made to drive it through to a conclusion before the American people have any opportunity to read its provisions or dig out of them the hidden and sinister purposes of the undertaking."

"The people have been taught that the league is merely an amicable agreement that the world shall remain at peace. They have been told that unless the league is consummated the world will be immediately involved in a chaos of war that will destroy the very foundations of society and civilization. People are taught that they can receive the benefits of this league without involving our country in any serious obligations."

"I affirm that it in fact proposes to set up a world government which will have control over all international matters as completely as the federal government now has jurisdiction over questions affecting the states of the union."

"Moreover, it will have jurisdiction of domestic matters which in the opinion of the majority of the league may tend to produce difficulties out of which war may spring."

"The seat of this league will become in fact the capitol of the world."

"The construction of the league is essentially autocratic. The powers are so highly centralized and so utterly without balances, checks, or safeguards as to be repugnant to all forms of democracy."
