NOTICE. THE MODEL SEWING MACHINE.

(From the New York Herald.) Prominent among the mechanical trium; he of this most ingenious age, common honesty compels as to notice the Empire Sewing Machine, commended as justly styled perfection itself. Useful as have styled been the various sewing machines, from time to time presented to the public, each one them has been cursed with some radical defeet, which detracts from general utility. Warned by the experience of his predecess. ors, the inventor of the Empire Machine has produced an instrument, combining all the advantages for which others are varinted and obviating every defect which can be attributed to them by the most fastidious

The Empire Machine is a marvellous combination of simplicity, economy and perfect warkmanship, being derable, free from liability to get out of order, noiseless, and easy of operation. Its mechanical contrivance is such as to secure stability, freedom from neither rip nor ravel, while, at the same species of material from leather to cambric, with threads of cotton, linen or silk, from the finest to the coursest number.

As the Empire Machine is gradually supplanting its more antique rivals, no one in want of a useful instrument of this description, be he or she tallor, coachmaker, dress maker or scanstress, can do otherwise than secure one of these economical and inimitable machines, suited alike for family and manufactoring purposes. The office of the Empire Manufactoring Co is at No. 536 Broadway, New York City, where they are new supplying these Empire Machines at prices for below the real value of the instruments - New York Herald.

Advantages of this Plow.

It will last from three to six times longer than any other Steel Plow made anywhere by anybody. This has often been proved by actual use in "grifty" soils, occasionally to be found on the margins of streams in the West, in which sheet-steel Plows have been habitually "cut through" in plowing eighty acres or less, it having already plowed over three hundred acres of the some soil without yet being half worn.

It will "scour" in the most difficult soils, where all other Plows have failed. If there is a rod of ground anywhere in which it will not scour, we have yet to find it.

yet to find it.

It draws lighter than any other Plow while cutting the same width and depth.

The Share can be sharpened, or a Point webded on, as readily as on ordinary Plows, by any blacksmith who understands his trade, as the steel is perfectly malleable, and works "kindly".

Any section can be replaced by a duplicate, to be had of any Agent, as the Share, I and Mouldboar is are cast in moulds.

It is well stocked with New England second-growth timber, and the standard is wrought fron, with "slota" in the cap so as to give or take land at pleasure. It plows at any depth, from three

to twelve inches, works perfectly in either stubble or turf, leaves a clean furrow, and turns under stubble and foul trash completely. It is the cheapest Plow in the

Listhe cheapest Plow in the symbol. Just as sure as there is economy in paying systems. The symbol. Th

These remarks are made after a familiarity with the merits of most of the good Plows in use in the West, many of which have justly earned a good remutation.

Our new model "B" Plow is Re-designed expressly for stubble and foul ground as licretofore we have had only the "C" pattern dostright for both, turf and stubble. The "B" and Re-"" patterns together will enable us, to meet the Agricus of all as to shape, and give them either Ke-"bold" or "lean" plows as they prefer.

The wellknown Dr. Morr says of these pills:—"I have used the formula from which your Fills are used in my prescice for ever 12 years; they have the finest effect on the Liver and Digestive Organs of any medicine in the world, and are the most perfect Purgative which havever yet been made by sinybody. They are safe and pleasant to take, but powerful to cure. The penetrating properties stimulate the vital activities of the body, remove the obstructions of its organs, purify the blood, and expel disease. They purge out the foul humors which breed and grow distemper, simulate sluggish or disordered organs into their natural actions, and impart a healthy ton; with strength to the whole system. Not only do they cure the every day compaints of everybody, but also formidable and dangerous diseases, and being purely vegetable are free from any risk or harm."
