MILLION WORKMEN IN AUSTRIA ARE STRIKING FOR END OF WAR

SEVEN HOUR DAY SUGGESTED AS AN INDUSTRIAL HELP

INDIANAPOLIS, Jan. 23.—A universal seven hour day during the period of the war in the various states of the nation, instead of the present spasmodic suspension of industries by the Fuel Administration to conserve the coal and relieve the railroad congestion was the suggestion made today by Samuel Gompers, president of the American Federation of Labor, in a speech before the delegates attending the convention here of the United Mine Workers.

Mr. Gompers stated that steady work in all industries instead of so many off days would best serve the country, keep the people employed for regular hours and keep the wheels of commerce turning.

Regarding the seven hour day Mr. Gompers said that this seemed to be a splendid solution for the present fuel troubles. The speaker urged the delegates to impress upon all men in the United Mine Workers to help the government upon every issue and thus win the war.
