Telephone Service Extended.

During this week a new toll line has been brought into the Philadelphia Central from Ackerman. At present there are four toll lines; one to Newton, and two to Louisville, and the one that has just been added to Ackerman. With Noxapater and other points using the line going North the service has been rather poor and overworked. The line will make communications north much easier. The whole system of the local service is undergoing a complete overhauling. New materials have been ordered. Naturally there will be some disruption of the service through out the summer until everything can be put in repair. That something is being done to improve the service which has been none too good is most encouraging.

Certain-teed Roofing Resists Fire

Certain-teed Roofing is fire retarding and spark proof; consequently your fire risk is greatly reduced when **Certain-teed** roofs your buildings.

Burning embers carried by the wind from nearby fires are always a menace to old fashioned, inflammable wood shingle roofs. **Certain-teed** forms a permanent protection against sparks and embers and all such carriers of fire.

Because of the great risk of general conflagrations in congested districts, and of the lack of safe fire protection in the outlying and rural districts you should get this **Certain-teed** protection on your buildings.

In addition to being fire resisting, **Certain-teed** is a most economical roof. It resists all forms of weather attack—rain, sleet, snow, sun, etc. It is guaranteed by the manufacturer for 5, 10 or 15 years, according to the weight you select.

There is a scarcity of many types of roofing products—you can always get **Certain-teed** Smooth Surfaced Roofing, the most economical and serviceable roofing to be obtained.

See your dealer at once. He either has **Certain-teed** or can get it quickly from a nearby **Certain-teed** warehouse.
