MOTOR MAIL CARRIERS.

Postmaster General Burleson has authorized 500 automobile rural routes and of these, 288 are in operation. The Post Office Department statements would lead one to think that this new departure is a great success, but it is to be born in mind that these statements are compiled in Washington, D. C. Reports from the field where the routes are actually in operation are far from agreeing with the Washington statements. In order to make the auto delivery practical it seems that mail routes on all main roads will have to be eliminated. The rural service was installed for the purpose of giving the people more efficient mail service and that primarily is the main business of the Post Office Department, but if in order to carry out the theories and ambitions of officials it becomes necessary to curtail this service, then the Post Office Department fails to meet the very purpose for which it was established. The Department seems to think that the Auto carrier service is a success because thereby routes have been consolidated and some carriers have been removed, but at the same time the service has been restricted and the convenience of the service for many people lessened. Still further, postmasters are finding it difficult to secure men who are willing to take the auto routes and furnish their own autos. At Law-

ton, Oklahoma, three auto routes were established but the postmaster was unable to get men that would try it, and three motorcycles were pressed into service. Three different carriers tried the auto route out of Temple, Oklahoma and all asked to be relieved. Patrons are protesting against this service or rather lack of service.

Schools May Bar Children.

Common colds are contagious and boards of health in many cities are considering barring children with colds from school. Foley's Honey and Tar is an old and reliable family medicine and frees children from coughs, colds, croup and whooping cough. Parents may save trouble by giving before school opens. Madam Laurel Announces

THAT the Annual Presentation Sale of

"The World's Greatest Fuel Savers"

WILL START ON

Thursday, Sept. 30, 1915

The Laurel Range is the most wonderful and economical range made. The only range made that will save one-third of the fuel bill. The only range made where one can heat the six griddles at once and not waste heat or fuel. The only range made where one can heat the oven without heating the reservoir. Also the only range made that will heat the reservoir without heating the oven.

With every Laurel Range sold during the month of October we will give a beautiful six-piece set of "Wear-Ever" Aluminum Ware FREE

The Only Three Way Damper Controlled Range in the World.

THE OLD WAY
 Only heating three griddles and all the heat going up the chimney. It costs money to own a range that does this.

THE "LAUREL WAY"
 Heats all six griddles at once. No waste of heat or fuel. You can save money with a range that operates like this.

Heat is circulated entirely around every square inch of the oven—over every one of the six top covers without heating the oven and wasting fuel when you only wish to boil, fry or stew. Study this picture and understand why you are losing money every hour you operate your old range.
