SHORTS AND MIDLINGS—The department of horticulture, Ohio State University, will grow 1,000 varieties and strains of vegetables in 1941 as part of the preparations for the annual meeting of the Vegetable Growers' Association of America to be held on the campus August 4 to 7.

Out of the total of 61,021,870 bushels of 1940 corn in 13 states upon which farmers have obtained government loans, Ohio farmers have 170,000 bushels under seal as collateral for loans amounting to \$104,165.43. The total amount loaned by the government on 1940 corn in the 13 states is \$37,173,484.11.

The 1941 federal agricultural adjustment plan again permits Ohio farmers to obtain limestone and superphosphate and to pay for them later out of money earned by adopting soil improvement practices on farms cooperating in the national farm program. Arrangements can be made to obtain the soil building materials by visiting the county AAA office.

A survey of methods of marketing poultry and eggs in Wyandot county showed that the 134 poultrymen who were visited knew of 68 egg buyers and 29 poultry buyers who made purchases in that county. Huron county poultrymen knew of 65 egg buyers and 49 poultry buyers in that county. The criss-crossing travels of the buyers must make the overlapping of milk delivery routes in cities appear efficient.
