Recipes and Advice
Interest to Housewives

WHEN YOU MAKE YOUR OWN VINEGAR FRUIT SHOULD BE SOUND AND RIPE; MANY WILD FRUITS CAN BE UTILIZED; DON'T ADD "MOTHER" TO FRESH JUICE.

Vinegar is one of the condiments which every good cook regards as a necessity on her pantry shelves. Used with discretion, food to which it is added will be transformed into a relish and will give zest to an otherwise insipid meal. Along with other groceries, vinegar has gone up in price since the Great War, until in many parts of the country 50 to 60 cents a gallon is now the retail market price. The making of vinegar at home is a simple process and not many years ago was practiced by nearly everyone who could obtain the necessary fruit juice. With the present high price of vinegar there has been a revival of this old household art. Those who have set up a vinegar keg or barrel, secure a superior product and at the same time beat old High Cost of Living.

Keep These Don'ts in Mind When Making Vinegar.

Don't put the freshly pressed juice into old vinegar kegs or barrels without thoroughly cleansing and scalding. But if, however, the barrels have a protective coating of rosin and paraffin on the inside, do not scald, for hot water will remove the coating. Old barrels with vinegar in them or the addition of vinegar directly to the fresh fruit will prevent it from ever making vinegar.

Don't add "mother" to freshly pressed juice. It will spoil the juice for vinegar making. Add surface "mother" only after alcoholic fermentation (bubbling) has ceased.

Don't add old "mother" from the bottom of an old vinegar barrel. Add only "mother" from the surface and good strong vinegar.

Don't put in a cold cellar. Fermentation either will be entirely prevented.

ed or will be very slow, sometimes continuing for two years.

Don't store in full barrels and expect it to make vinegar. Barrels a 1 kegs should be filled half full and left on sides. Holes should be bored in each head just above the juice and the bung left open to give circulation of air. Cover holes with cloth to keep insects away.

Don't put in too warm a place or expose to sunlight in summer to hasten fermentation. It may prevent it. The best temperature is between 80° and 90° F.

Don't, after vinegar is made, leave it exposed to the air. The acid will

gradually disappear and it will "turn to water."

Don't, if unsuccessful, think your "cellar won't make good vinegar." Either the fruit did not contain enough sugar, or you unconsciously, perhaps, failed to follow some important step in the directions. Even in vinegar making "practice makes perfect."

The season for home canning and drying does not end with summer or early autumn. Many things may be canned or dried in October and November. Among these are turnips, spinach, squash, pumpkin, carrots, parsnips, cabbage, celery, beets, late corn, kale, chard, salsify, and tomatoes.

CARRIES A BIG GUN ON FLIGHT

New Army Aeroplane is Able to Lift 3,300 Pounds

A new military biplane which can lift 3,300 pounds and remain in the air twenty-five hours has been given successful trials in Italy. The machine has three motors which develop an aggregate of 300 horsepower and it is said the craft can attain a speed of 75 miles an hour. It carries a big rapid fire gun. On its height trial the machine went up 6,000 feet.

An Iowa barber has invented a pair of ball-bearing barber shears, which promise to revolutionize the scissors industry. The new pair is said to be far superior to the old sort of shears, will work much easier, cut better and will never wear out.

Fireside Talks

With Members of the Newspaper Bible Class

Pilgrim Congregational Church
Oak Park, Ill.

SUNDAY SCHOOL LESSON FOR SEPTEMBER 21, 1919: "THE HOLY SCRIPTURES."

Golden Text: "Thy word is a lamp unto my feet, and light unto my path." Psalm 119:105.

Lesson II Timothy 3:14-17.

The Greatest Book in the World. No matter what we think of the Bible we are all obliged to concede that it is the Greatest Book in the world. No other book has so large a circulation in so many different languages. No other book has influenced the thinking, the religious life, and the social order of the world so much as the Bible. It is a source of comfort to those who sorrow. It gives un-failing strength to those who are weak. It is a letter from God to His children. It is a map showing us the way to good. It is an album of photographs, of pictures of great saints and leaders.

Men who read the Bible regularly find that their language, their thinking, and their character is deeply changed. There is no greater resolve or promise that a man can make good than to read the Bible regularly. When Robert Moffatt was about to leave his home in Scotland to become a gardener for an English gentleman, his mother asked him to promise her something. "I do not like to make promises which I may not be able to fulfill," Robert told her. But seeing her disappointment he exclaimed, "Oh, mother, ask what you will, and I shall do it." "I only ask you whether you will read a chapter of the Bible every morning and another every evening." "Mother, you know I read the Bible." "I

know you do, but you do not read it regularly, or as a duty you owe to God."

The promise given was faithfully kept. In his little lodge in the garden he read and re-read the Book, and soon his spirit began to be troubled by a feeling of his unworthiness. He writes of that time: "I had undergone a great change of heart; and this, I believe, was produced by the Spirit of God through reading the Bible and the Bible only." With his change of heart came a deep longing to go out as a missionary, although he feared no missionary society would accept him on account of his youth and lack of education. How he went to South Africa and became one of the world's greatest missionaries, you well know.

When Sir Walter Scott was dying, he said to his secretary, "Read to me." "From what book?" the latter asked. "There is only one Book," Scott answered, and the Bible was read to him. The Bible was the only Book he needed in that hour when he was about to leave the Life Here for the Life Beyond; it is the only Book which teaches us how to live, so that we may be worthy of eternal life.

It is interesting to study the way in which the Bible grew. It was many hundreds of years in preparation. Every part is valuable, but the New Testament is conspicuously rich and important. Christian people believe that the Bible contains the progressive teaching, for reproof, for instruction in righteousness. He who hides God's Word in his heart will find life richer, happier and holier.

PROPER GLASSES

HARD work means a strain upon the delicate nerves and muscles of the eyes—and possible injury.

For School Children. Children in good health, with normal vision, have nothing to fear. Statistics show that only a small percentage have perfect eyesight. Know the truth about your child's eyes.
