A WONDERFUL PRESS.

REFERRING TO THE DAILY JOUR-NALS OF CHICAGO.

The Spicadid Support Given to It by the Merchants of the Place-Comparatively Small Circulation Obtained-Reasons for This Journalistic History.

Cuicago, May 21.-If there is anything engo it is its commercial character. I mean by this the magnificent support given it by commercial Chicago in the way of advertis-ing a support which enables the newspaper to print journals of much greate sublishers to print journals of much greater reellence than would be warranted by the carnings which come more directly from the readers. There are only five English morn-ing papers in Chicago, the third city of the country, and yet not one has a circulation as 50,000 copies daily. In New York, Iphia and Beston there are several journals which print nearly 100,000 copies each. Chicago is the center of a vast coun-try, reached by a score of railroads, and o has a larger population than Boston combined circulation of the five English morning papers of this city does not equal that of the two lending papers of Bos nor that of tipe two leading papers of New York. An explanation of this is easily found: First, the country immediately adjacent to this city, outside the suburban district, is but spaceely populated compared with the rural population of New England and the middle states. Moreover, the people of thriving western towns and minor cities ss upon the metropolitan press dwellers in towns of like size and similar location as regards the near-est great cities in the east. The provincial press is probably better developed and more enterprising in the west, and in entering to and retaining its home constituency has been largely aided by the splendid service afforded it by The American Press tion, which as a purveyor of news rivals the older press associations, and as a pro-vider of general reading matter is without a rival in the world. The second and greatest ter of newspaper circulation in the fact that three-fifths of the population here is of foreign birth or parentage, these people being largely non-readers of Efficient papers. Still largely non-readers of English papers can another came worthy of mention in commetion with the circulation of the morning press is the large circulation enjoyed by the even is the even is the enjoyed by the even is the more than 100,000 copies daily. I have presty good opportunity for judging the circulation of the papers of Chicago, and my ligures rem

This is a small output, individually and col-This is a small output, individually and col-iectively; and had these papers only such ad-vertising receipts as are enjoyed by eastern journals the press of Chicago would neces-arily make but poor comparison with that of New York, Boston or Phila-delphia, But Chicago is an advertis-ing city; its merchants, wide awake and enterprising, believe in the use of printers ink and pay immense sums of money therefor. The more favored journals get from twenty-five to thirty-five cents an agate line for their space, and of such lines there are fourteen in an inch. That makes about columns sold daily, and from thirty to seventy columns on Sunday, it is easy to see how

perous journals. Undoubtedly The Tribune. News and Herald earn more money each year than is necessary to defray the entire expens of running their establishments, excepting hments, excepting only the cost of the white paper used. Pribune certainly does, for its profits exceed \$200,000 a year over and above a lavish expenditure for news. On a recent Sunday The Tribune consisted of thirty-two pages, twenty three of which were filled with advernts, and the advertising earnings for the day are said to have exceeded \$14,000. Much of this was from the "classified" adver-tisements -to rent, help and situations wanted, for sale, etc.—of which The Tribune has a monopoly on Sandays. On the same Suniny the other morning papers were but little behind The Tribune, one printing twenty-sight pages, another twenty-four and another twenty. Quite a number of trades firms expend for advertising an average of \$1,000 a week, and one merchant has paid for everal Sundays past, us is his custom in the pring, more than \$2,000 each Sunday for ad-

arriag, more turn \$2,000 each Sunday for advertisements in the Chicago papers.

If any one thinks I am dwelling too much upon the finances of the Chicago press, and saying too little of its news, editorial and literary sides, let them remember that this lavish use of the newspaper columns by home merchants is the distinctive feature of the wish use of the newspaper colum Chicago press, and that it is the revenue thus afforded which enables the publishers to make their papers what they are

Notwithstanding the disparity in numbers of readers, the Chicago press is at least the squal of that of New York, and certainly superior to that of any other city on the continent. The Chicago press is not literary, nor pedantic, nor overburdened with dignity; and yet it is far from sensational, having reached happy medium between the "everything

THE DAILY INTER OCEAN.

years ago, and the dull dignity professed by some eastern journals. Chicago papers are well written, though not so well as those of New York or Boston, and are much more dis-criminative and better balanced than those of things which should not anywhere be printed. given to sensationalizing than those of Chi-cago, out here in the rowdy west. As newsers, pure and sample, the Chicago ionrnais suppers, pure and simple, the Chicago pairmais to attract attention by doing odd things in a may be said to lead all, not excepting those of New York. To my notion The Chicago Tribane excels any other paper in the United States at a newspaper. Probably it pays more money for telegraphic dispatches than any other, and all the matter which is also strong on detective work, and it comes pouring in is edited with great care and intelligence. As a purveyor of the news of a day—events occurring in all lands and all blaces reached by a telegraph. care and intelligence. As a purveyor of of a corps of processional sections frauds or the news of a day—events occurring in running down criminals, elections frauds or Featherly.

PAC SIMILES OF THE CHICAGO DAYLY NEWS, WAIL AND JOURNAL

chines: but they are something more than ness and quick perceptions and vast resources, mental and physical. In this The Tribune excels. It has a perceptiveness, an eagerness a timeliness an appreciativeness of opportunity, and enterprise to improve it quickly and well, possessed by but few journals in this

What I am saying is not intended so muas praise for The Tribune as it is to describe Chicago press by using The Tribune, in best example, as an illustration. The Tribune leads, but it has not all the excellence in town, or it would be head and shoulders above everything else in its field; and this it paper, but it is too much of a machine. It is rfunctory, handling well what comes to ing to reach out with ingenuity and enterprise. It is as much unlike the old Times that Blorey printed as it could be. Storey's Times was always turning something un. Times was always turning something up, always startling people; the modern Times does nothing of the sort. Storey used to send men as far as steam and stage coach could carry them if there was any prospect of their finding something good, particularly if it hap pened to be a rich scandal. It is a fact that The Times once had a professional scandal editor, who handled everything of that nature, traveling from the Rockfes to the Alleghenies in search of subjects for his salacious pen. The famous headlines of The Times, which helped make

are no more. In their place are seen the most commonplace headings imaginable. It is no secret that The Times is steadily going down hill. It is gradually losing in circula tion, partly because of the m aspect and partly because of the high price of 5 cents still asked for it. The Tribu Inter Ocean having come down to 3 cents The Times is under control of the courts, and s likely to remain there evermore. The con cern is now barely paying expenses, and is compelled to take advertising at lower rate than any other paper in town. It is still very popular in the country, where its chiel strength lies. In Storey's time The Time was the leading paper of the city; it was most talked about, had greatest influence an. circulation. Now it is in fi(th place. Could the famous old editor, whose name is still carried at the top of the editorial column thus: "The Chicago Times, by W. F. Storey," look out from his tomb and see his paper as it is, he would doubtless make a superhumar effort to rise from the grave and, setting fool boy up in his old time style. I do not mean is not quite so bad as that, but unless matter mend it soon will be. Newspapers once pros-perous and healthy can withstand a good deal of sickness and hardship and still live but I should not be surprised if in five or six years the splendid property were to be said out at foreclosed sale. There are plenty of

bright men on The Times staff, but the absence of its controlling genius has given the dry rot a chance to creep in, and as a consequence the paper lacks vicility and orig-For the first time in its history The Times is now an administration journal. Mrs. Storey, the dead journalist's walow, persisted in fighting for possession of the paper, and the remaining heirs are equally determined to keep her out. Meanwhile the paper is really controlled by Lawyer W. C. Goudy, President Cleveland's confidential ad viser in Chicago. After a long struggle The Tribune man-

aged to overcome the lead of The Times and take place as the first paper of Chicago. It was not able to do this until about the time Editor Storey lost his mental grip. The Tribune is now one of the best newspaper properties of the world. It is capitalize \$30,000, and the 30 shares are quoted at \$10,000 each. At that rate The Tribune may be said to be worth \$2,000,000. One hundred type for The Tribune and 150 on Saturday mghts. About 100 editors, reporters, etc., are employed, their work being here in the city. The Tribune is owned by the Medill family, and is determined to have Biaine becaused for the resulting and the second section.

ted for the presidency next year. The Inter Ocean is the remaining paper of the first class—that is, eight pages and high price. It was founded in 1872 by J. Young Scammon, then a very rich man, rated at \$5,000,000. Now he could not false \$5,000 in cash. So much for the man who started a newspaper. But it was not the paper which impoverished him. The panic of 1878, a bank failure, too many mortgages, etc., are responsible for his fortune's disappearance. The later Ocean grew out of The Republican, of which Charles A. Dana made a brilliant paper, but a financial failure. Millions of dollars have been swallowed up in it, and even yet it manages to live only from hand to mouth and by dint of much dramming and bustling. It is heavily in debt, but its manager, William Pean Nixon, is a genius, and nobody doubts his

ability to pull the paper through.
Undoubtedly the second journal in Chicago in point of influence and popularity is The Herald, a two cent paper, which is only seven years old, but which is making a great deal of money. Not much money was ever spent on it, either, and its success has been almost phenomenal. It is The New York Sun of the west, lacking The Sun's weaknesses, but also failing to possess many of its prototype's strong features. The strength of The Herald lies in its editorial astuteness, its independence and at the same time its fairness, in its close on to home news and gosip, its special features of local interest and its model business management. The Sunday edition of The Heraid is probably the most popular paper in Cuicago, The Heraid was started by a coterie of young journalists, who made a success from a professional point of view, but lacked the money to carry their venture long enough to reap the reward. But this is nothing new in the history of newspapers. The Herald excels in the local field, and has a larger circulation in Chicago and immediate

suburbs than any other morning paper. The News is printed both morning and evening. Started a dozen years ago by some young men with a few thousand dollars capital, it is to-day earning a profit of \$75,000 a year. The evening edition is the most extensively circulated paper in the west, and but than the ice cream freezer. Tid Bits few daily papers in the world excel it in numher of copies printed. Each evening The News prints and sells about 115,000 papers. the latter city. They are well arranged, no longer offend the eye with typographic monstrosities, nor the morni sensibilities with those singular fact that the morning and evening "No, it isn't possible?"

"Yes, he is married to her. She confes same persons, are managed as distinct properties, financially and enterially. There is all her flirtations." papers of cultured Boston are much more a complete staff of editors and reporters for "You don't say! What a wonderful mean each issue. The News is managed with energy, and, like The New York World, likes to attract attention by doing odd things in ${\bf a}$

many friends in Chicago, and has won a great victory in building up his paper in short a time. The Mail has a circulation of about 60,000 copies daily. Like The News it is sold for one cent. The Mail is straight

Republican, but anti Blaine. The Evening Journal is the remaining Eng-lish evening paper. It is the oldest paper in the city and caters to the wealthier classes, enjoying a circulation of about 20,000 amo the last people of the city. It is sold at tw

There is not one straight Democratic paper in the city. The Tribune, Inter Ocean, Mail and Journal are Republican, the News Mug wump and the Herald and Times Independ wamp and the Herail and Time Independent, both indorsing the administration. The News, Heraid and Tribune print pictures, each naving an accomplished artist on its staff. About Supprinters find employment on the English dailies of Chicago, and about 300 editors and reporters. The average earning of the printers is \$25 a week, and of the editors and reporters about \$20. The two morning at 3 o'clock carry about 25,000 copie of the Chicago dailies to the people of Illi nois, town and Wisconsin.

WALTER WELLMAN.

PARSON BROWNLOW'S PROPHECY. His Son Tells How He Predicted the

Rebellion. Special Correspondence.] WASHINGTON, May 50 - Col. John Brown law, the sou of Parson Browniow, the noted aghting preacher of the rebellion, was speaking to me to day of some of the reminiscences published in Allen Thorn-like Rice's book or Lincoln. During the conversation he spokof the article by the artist Wyatt, who painted Lincoln's portrait for describes a scene in which Mr. Lincoln, look spoke substantially as follows: "Parsot Brownlow says that I am half negro, and if you look at that picture you might think so

John Brownlow does not believe that Lin coin made any such statement. He says his father certainly never said that Lincoln was half negro, for Parson Brownlow had long held a high respect for Lincoln, and he had had some correspondence with him previou curred. Said Col. Brownlow: "There was a statement published over the south that Ham lin was half negro, and it may have been that my father quoted this article, as did many of the other southern papers, and Pres ident Lincoln may have said in his laughin way that Parson Brownlow had said that Hamlin was half negro, and, to look at that portrait, one might think that he also had

"My father," continued Col. Brownlow. "foresaw the war years before it occurred When I was at college in Virginia the election of 1856 took place, and my father wrote me in regard to the result. He spoke of the election of Buchanan and said: 'In four years from now we will have another presidential election. The Democratic party will divide and will take one candidate from the north and another from the south. They will be defeated and a Republican will be elected The south will not submit to this, and the cotton growing states will secrete. I don't will go out of the Union. think Tennessee will go out of the Union, nor will the other border states. The north in the office, discharge everylasdy from office will not consent to this secession, and we will have a war of several years' duration." of this prophecy came true, and I would give \$100 if I had in my possession that letter, the contents of which are photographed on my

CLEVELAND, O., May 31.-Miss Amelia Louise Groll, the young singer who is en-gaged by Carl Rosa to sing in London during the queen's jubilee, is an Ohio lady. She is scarcely 23 years of age and is a striking type of a blonde. She studied at the Cincinnati College of Music when 17, and at highest honors of

that institution She traveled for a senson with an opera company through the west ern states in 1883, 200 In 1885 she went to Paris and studied stage, at the same time-ing church After a C

year of hard study she went to Berlin and Vieuna, and sang acceptably at both places. During the last carnival at Rome she sang under the management of Zonfondi. but it is not likely that she will return to the United States for several years. When her senson in London expires, she is under contract to go on a South American tour. She

will then return to Bome. Ouite Too Enthusiastic.

Husband-Well, she's just a daisy. Wife deily |- Think so!

Why, she has a complexion like a moss rose, and eyes like—like—I don't know what. And her teeth are splendid, too.

North are splendid, too.

Of course, every one knows that codfish are saltest and dried in the sun. But every one does not know that a codfish must be handlest about twenty times to be handlest about twenty times. Next day when John went bome to dinner

he was let in by a girl with a complexion and teeth like two rows of piano keys. Bos-ton Courier.

Guest-I got a little chilled in the surf, and fire

A Kemarkable Memory. It is almost literally true, as the pub married old Moneybags, said a New York a mile from the village. There are no houses lishers claim, that "everybody in Chi-gentleman to a friend, in the lady in question or fences where it has burned and it has cago reads The Evening News," The Morning —or rather the questionable hady—tripped blackened many a mile of tail side.

"No, it isn't possible?"
"Yes, he is married to her. She confessed

wire—this paper is without an equal on the continent. "It has the space and the money, too." All great newspapers are great man in the lity and after a long struggle, is now." York Sun.

FISHERS FOR COD.

SECONSETT, A VILLAGE ON THE FUR-THER END OF NANTUCKET.

Brothers to Down to the Sea in Little Boats and Brave the Dangers of the Deep with Stoot Hearts.

what remote at this time of year; but the fishing village of Seronsett, at the further end of the island, eight miles from Nantucket town, is remoter. We have now no railway no stage, no regular mail, no telegraph, no store, no postoffice, no hotels open, no church services on Sunday. Our store is opened for the public convenience on Mondays, Wednesdays and Fridays. Our population numbers about forty souls and bodies. There are 120 empty summer cottages, all of which will be Seconsett a few weeks hence will have a

population of 400 or 500. Its twenty able bodied men are now off in the tents youder cod fishing. You can just see them on the hazy ocean, one man to the boat more bits of black outline on the water. The black up that is all the Seconsett wife or maiden wer of bushand or lover. They put off at certain times of tide when the fish hite best. Sometimes they are all affort by 5 in the morning. and a beautiful picture it is to see these dots riding on the broad sheet of golden radiance east on the sea by the rising sun. One ma will pull these "dories on the very edge and sometimes in the very crest of a big wave tumbling on the beach. I have had some boat experience on various sens, but I never in whose bows, as they were shot forward, projected two or three inches over the beach them. These Seconsett fishers are as careles of these tumbling masses of water as are the ione Islands off San Francisco. I have seen Rip here where, as the long breakers rolled in, they were apparently all out of water one ment and under it the next. Pochick Rip is at certain turns of tide an ocean Hell Gate, roaring, foaming, seething. Compared to it the East river Hell Gate is a mere wash bowi of maritime agitation. Further out at sea, off Back," dreaded by sailors, and in whose sands lie many a vessel's bones. These sands are about a mile from shore, their presence being indicated now and then by the gleam of white sticking out of water. The natives one morn ing about six weeks ago saw three mastremers now you see but one. They found out eventually they belonged to a three maste schooner from Bangor, loaded with lime. She strayed on the shoal at night. Nothing he down with her or were capsized in the break ers after taking to their b are relatively common here. These shore sands are full of weards, some completely buried out of sight and many yards from where the sea is now pounding pebbles into

The fishermen's cottages at Seconsett are maritime constructions on land. Some are over a century old. In cases the builder would not allow himself a window bigger than a stern port. A man of Nantucket, who has lived on the sea seven tenths of his life. can't bear to see daylight streaming through a window as big as a burn door. It looks in secure, and in case of a storm a sea might be shipped through such an expanse of window glass. The streets here were not laid out They came up or drifted in of themselves As a result they narrow and widen in studden and eccentric fushions. Since the village ha become a summer resort attempts have been made to requiste them and make them behave themselves in something like town fashion. But the line will straggle like at old fashioned general training. the hen coop is at the front sometimes the house. Then they've stack names on every little gap between two cottages and called it a "inne" or "street." Such attempts to be a town remind one of a small boy in his pay The result is neither good for the boy

The cost fisher's "dory" is the result of a ioning a craft for rough water and ocean beach landing. They came into use about She also sang in Bologna with success, the twenty old years age. Stern and bow rise Gazzetta dell' Emilia, of Bologna, praising a foot higher than the waist. There is a her voice and execution. Miss Groli has re-small area of elliptically shaped flat bottom, ceived many flattering offers to a sid America. A flat bottom slides easily up and down the sandy beach. A keeled bottom cuts in and furrows. If the "dory" is swaing by a wave broadside to it is still swept up the beach on a mere scum of water. If a keeled bottomed bout is swaing broadside to she sticks, rolls over and the next wave may smash her sides The next wave only slides the "dory" further Wife-What do you think of the new girl, up the sands. These are very important considerations where, instead of a pier landing, Husband-Was that her that just let me smooth water and a flight of steps, you have only a swash of tons on tons of foam and sea green water every twenty seconds. The "dory" is the most difficult bont affont to cap-

cured. It must be put under cover in damp be was let in by a girl with a complexion weather or it will spoil. It must be put unlike polished abony, eyes as large as saucers der cover at night, for the nights here are always damp. It won't dry properly in every shade of surshine. If the sun is too hot it cooks the fish and ruins its flavor. If the sunshine is hazy or semi-cloudy it won't an swer. The fish are always going on and con-ing off the "drying stages." Now you may see why it is timt the weather is an article of

such importance here. How little here do we care or know of the great, troubled, miserable world on the continent. The family with whom I am staying do not take even a weekly paper. We do not want one. We don't see the necessity or advantage of having the catalogue of the world's miseries, murders, suicides, fires, plagues, smashups and burglaries dumped on us fresh every morning. We have events enough here. Yesterday Levi Coffin caught seventy cod. The day before our ben came off her nest with only four chickens.

We set a new ben last night. Somebody has let foxes loose on the island, and they are killing hens at an alarming rate. We keep a great many hers here. The town pump is being repaired. Besides this the island is on fire. It has been on fire for days. It's a scrub ook, meal vine and dry grass fire. It I was directed to the engine room to warm up.

Strub ook, menl vine and dry grass fire. It

Proprietor—Oh, I see. Well, perhaps you'll has covered miles of the bare, bleak island, find the boiler behind you more comfortable roiling up a great cloud of smoke as it eats its way to windward, about three miles from us. A QUESTION OF HEALTH.

Bread, biscuit and cake, now generally made by the aid of baking powder, enter so largely into our daily food that their debasement by the introduction of any injurious or deteriorating substance is a matter of serious concern to the public health. What baking powder shall we use to avoid the lime and alum now found in so many leavening agents. and to insure pure, sweet and wholesome bread, is a question, therefore, of direct importance to every individual.

It is an indisputable fact that all baking powders with the single exception of the "Royal" contain one or the other of these adulterants-lime or alum-in quantities from five to twenty per cent. Alum "is poisonous. Lime reduces their strength not only but (aside from its injurious effects upon the system) by debasing our food with a useless substance robs it of a portion of its nutritions qualities, thereby depriving our bodies of the full sustenance necessary to maintain that bodily vigor requisite to protect us from disease.

The importance of this matter in its bearing upon the life and health of the public is much more fully realized in England, where severe punishments, under stringent laws prohibiting the manufacture and sale of adulterated articles of food, are of frequent occurrence,

The "Royal" has been determined by the Government chemists and the most prominent food analysts to be the only baking powder made that is entirely free from lime, along and other impurities, and absolutely pure. It is made from cream of tartar refined for its exclusive use by patent processes by which the tartrate of lime is totally eliminated. No other baking powder manufacturer uses chemically pure cream of tartar, and hence the adulteration of other brands. The "Royal" is, accordingly, the only baking powder that will produce perfectly pure bread, biscuit, cake, pastry, etc.; and these articles are now pronounced more wholesome when raised by the Royal Baking Powder than when leavened by any other

It is particularly a question of health, therefore, what baking powder we shall use; and those who appreciate the miseries of dyspepsia and other ailments that follow the use of impure food will not hesitate to select the "Royal."
