

THE NEW CONGRESS!

NOW THE CAPITOL LOOKED AT THE OPENING.

How Members Not on the List, and Who Certainly Will Be Missed—Uncertainty of Political Greatness—Names of Congressmen.

WASHINGTON, Dec. 5.—The new congress came together today. Long before 10 o'clock the galleries were filled, and an hour later the three acres of space which forms the site of the building was hummed by the throng of the galleries of the house and senate. The wooden men who act as doorkeepers and messengers came out, as usual, on such days in all their glory. They donned over the crowd. They shoved back this woman, and pushed that man away. They put on three times as many airs as the senators themselves, and their dignity far surpassed that of the supreme judges. Pretty women and great men looked like so many flower gardens, and the prince of Babylon would have been glad to have had such hanging bouquets on the outside of his famous palace. The colored citizens were out in their night, and phoned like the Capitol across in a light from the dull ashes of the recess into the liveliest activity of one of the liveliest sessions in our history.

Speaker Carlisle called the house to order, and he made a most satisfactory presiding officer. His contest with Thoburn amounted to nothing, and he is to be the leader of the Democratic house this year, as he was last. Many new faces were seen in the house today, and many were the reminders of the political heads that have been cut off. About 40 per cent of the last congress is absent and 130 members have been retired. Frank Hiseock's majestic form, tightly buttoned in his black Prince Albert coat, is seen no more among the Republicans, and his dark hair, some falls will, now be reserved for the senatorial gallery. Daniel, of Virginia, with his crutch and his refined features, has also gone up higher; and good, kind hearted, earnest, and his hair, and his dark hair, some falls will, now be reserved for the senatorial gallery. Daniel, of Virginia, with his crutch and his refined features, has also gone up higher; and good, kind hearted, earnest, and his hair, and his dark hair, some falls will, now be reserved for the senatorial gallery.

Then, Ranney, of Massachusetts, the noted lawyer member, who conducted the Pan Electric telephone investigation, has gone back to his law practice, and his dark hair, some falls will, now be reserved for the senatorial gallery. Daniel, of Virginia, with his crutch and his refined features, has also gone up higher; and good, kind hearted, earnest, and his hair, and his dark hair, some falls will, now be reserved for the senatorial gallery.

Many of the southern members are not present, and the most missed man is Randolph Tucker, whose kind manner and sterling worth will be remembered long after he is put under the sod. He will practice law in Washington, Virginia, and he will be a richer man out of congress than in it.

The new members feel lost, and everything they see looks big to them. The chestnut story of Senator Stewart, of Oregon, is going the rounds among them, and they are recalling how Newhall said when he first came to congress: "I was surprised at the ability of the men I met, and as I took my seat among the statesmen I looked around me that magnificent body of men and wondered how in the world I ever got there among them. About two weeks later, when the strangeness had worn off, I again looked around on that magnificent body of men and I again wondered, and this time, it was how in the world I ever got there."

Congressmen are, in fact, very much like other men, and the average of human greatness is not very much higher than God's ordinary creation. It is the same intellectually as physically. No one man is twice as tall as any other ordinary man, and none of these congressmen know much more than the average reader of this article. They strut around here in their store clothes and make me to wonder.

"Now, in the name of all the gods at once, upon what most do these our Congresses feed, that they are grown so great?" Many of them forget that they were all raw red babies once, and they will certainly all be carried by, and they will certainly all be shorter than their physical ones, and fully one-third of each congress is not returned. You may walk about Washington today, and you will meet on every corner a man who, a year or two ago, carried his head high in political life, but who now has a head to head to speak of. You may see Secretary of

WAR BELKAP, who, in Grant's administration, was one of the most great and most noted. You may see Gen. John Tyler, who, when his father was president, was the pet of the ladies and the courted of the men. Now he is a treasury clerk, and his four in hand has degenerated into a huckney cab or a street car. Horatio King, Buchanan's postmaster general, lives a quiet life here, respected but retired. Ex Postmaster General Tyler and Crosswell have left political life and are delving for the dollars. There are more up and downs in the world of politics than in the world of money making, and the only difference is that in politics the rises is sure to fall before the rise, whereas as the rich man may carry his gold to his coffin and put his bones under a palatial mausoleum.

In the meantime the fickle world goes on, and like the French populace, it cries "La, rotte mort! Vive le roi!" The world wants to know the ups, and it doesn't care a cent for the downs. The new congress is an eminently respectable body of men, and many of the new faces indicate the existence of decided brains behind them. The new congress is an eminently respectable body of men, and many of the new faces indicate the existence of decided brains behind them.

London's "Ragged Sunday Schools," which are declared to be the great means of teaching and improving the poor children of that city, are increasing fast in numbers and influence. They now have 40,000 scholars and 4,000 teachers.—New York Sun.

THE INLAND SEAS.

2,000 AMERICAN VESSELS ON THE GREAT LAKES.

3,000 Ton Steamers Afloat—Sailing Fast Giving Way to Steam—Canadian Shipping Disappearing from the Lakes. American Tonnage in W. Times.

BUFFALO, N. Y., Dec. 5. The shipping season of 1887, now about closing, has been most prosperous. Though it was only opened in 1880, which was also a season of high freights and heavy shipments, the showing is really unexcelled, from the fact that the really important tonnage since that time has made the actual profits far greater than ever before. The lake trade is a peculiar one, and necessarily much more fluctuating than rail or ocean business. With the opening of the trade that began in 1881, which was brought about by stagnation in the iron trade, aided by a light foreign demand for grain, the lake fleet added very few vessels to its list; but the middle of June last year there sprang up a sudden and heavy unexpected demand for ore carriers; now mines rapidly developed at Ashland and Two Harbors at the farther end of Lake Superior, thus necessitating long trips, and since that time there has been a steady demand for ore vessels. This is now more pronounced than that for wheat, coal or lumber carriers, though it is usually expected to drop off some weeks before the coal or wheat trade, especially the one usually referred to in the pockets before the lake trade.

The lake trade is comparatively in its infancy, yet it has assumed of late years some thing like giant proportions. As lately as 1870 the tonnage passing through the Sault canal and from Lake Superior to the St. Lawrence, reaching but 500,000 tons in 1880, while in 1886 it had grown to more than nine times that amount, actually exceeding the famous Suez canal in tonnage and freight transmitted. The Lake Superior region was far and away the most important demand for grain in 1886-7 to reach it, but Lake Michigan profited by the water route to Buffalo and via the Erie canal to New York as far as the development of the western wheat and corn country is concerned. The change from that time to the present can perhaps be no better shown than by reference to the fact that wheat freights were twenty-five cents a bushel from Chicago to Buffalo in war time, and a citizen of Buffalo remembers seeing just off the city sixty-three schooners in a single morning. They carried from 5,000 to 7,000 bushels each, and when one season a schooner arrived with 10,000 bushels of oats, a Buffalo editor filled a column of his paper trying to show that cargoes of such prodigious size could never be made to pay!

Today the canal schooner of even 20,000 or 30,000 bushel capacity is voted of no account, and more than one vessel has reached Buffalo this season with a cargo of 50,000 bushels. In 1818, five years after Perry's fleet of sail-boats had "burned" the British, with another fleet of sailboats, off Lake Erie, the fleet of the great lakes, flying the American flag, numbered fifty craft, yet the combined tonnage of them was less than that of a single schooner of this year by a single craft built at Buffalo, Cleveland or in the shipyards of Detroit or Saginaw bay.

The evolution of the lake vessel of today has been steady and regular. It was at first a single masted sail craft of less than 100 tons, capable of navigating crooked and entering every angle of a harbor on the lakes. It was small enough, too, to be poled or dragged by oars up the inlets in the absence of anything answering more directly to the present steam tug. The next step was the larger square rigged craft, which was not superseded till several years of experiment in steam had followed the launching of the Walk-in-the-Water at Buffalo, in 1847. Then a season of the clumsy and slow steamer alongside the sailing craft, then the discovery, early in the forties, of the screw propeller and its superior adaptability to narrow and crooked passages.

Then came a new idea, the steamer took undisciplined lead over sail craft, the side wheeler nearly disappeared and the propeller took the schooner or barge in tow, and long lines of from two to eight vessels were seen passing up and down the lakes in tow of a single steamer. It was not long so popular that a schooner with topmasts is already becoming a rarity. The schooner's tow line is wind and nautical lore, sufficient in itself so long as it holds together. Since towing became the rule, the sailing vessel, having taken place in steam craft, the river tug of about 100 tons, but carrying no cargo, was for awhile the favorite. The name was from the fact that these tugs were used mainly to tow schooners through the Detroit and Erie rivers, and his wife, who has many of the qualities of Mrs. John A. Logan, will be one of the leading ladies of the capital. She will rank next in standing to the wife of the president, and she is both beautiful and accomplished. She comes from New York, and her father moved to Kansas when she was a girl, and she married Ingalls when he was a young lawyer there. She has a very pretty daughter, who will be one of the debutantes this winter.

Mrs. Carlisle will still remain at the Riggs house, and this will make her the only thing of a society center. She will give her afternoon teas and receptions and will dispense her Kentucky hospitality as far as she can at an hotel. As if she has to keep up the whole of her family, and her father, for the speaker is not much of a society man, and though he attends dinners now and then, and goes to the regular Washington receptions, he would rather think figures than drink champagne, and gets more fun out of statistics and free trade ideas than from poker, whist or lacrosse.

THE BLIND IN CHINA. Miss Gordon Cumming, of England, has missed lately some very curious and interesting particulars concerning a successful attempt to teach the blind in China. It is stated that there are more than 500,000 of blind people in China. Through the instrumentality of Mr. W. H. Murray, who introduced a phonetic system of teaching by means of embossed dots, a school for the blind has been opened at Pekin, and it is worthy of note that the pupils there learn to read more quickly than the children who have the use of their eyes, tending to show that Chinese typography requires retooling.—Chicago Tribune.

On her marriage with Senator Corcoran of the Castillo, Senora de Osmo received more than 1,000 presents, valued at more than \$250,000.

Harvard senior has "thirty handkerchiefs with lace on the edges mailed up consistently in his room, with the souvenir of a distinct summer flirtation." Although flirtation is, so to speak, an elective study at Harvard, it is evident that the young men prosecute it with vigor.—New York Tribune.

"Ragged" Sunday Schools. London's "Ragged Sunday Schools," which are declared to be the great means of teaching and improving the poor children of that city, are increasing fast in numbers and influence. They now have 40,000 scholars and 4,000 teachers.—New York Sun.

THE INLAND SEAS.

practically then, too, the ship building class is bound to create an over supply sooner or later. Already this year fifty new craft have appeared, with more than 1,000 tons capacity, and there are at least half as many more under contract, with a still greater average capacity. A thoroughly dull season will find bulk returning to take lines on vessels that cost \$225,000, and that state of things alone will stop the rush of ship building. The Canadian lake marine is every year becoming less. Only one or two vessels were built this year, and those for passenger or way trade only. Canada is shut out of so many ports that she is entirely dropped.

The American lake fleet numbers about 2,000 vessels. Of this number—in which harbor tugs are included, but no vessels used for pleasure—rather more than half carry steam, and the proportion of steam vessels is constantly increasing, less than half a dozen sail vessels having been built this season. The canal schooners are disappearing, never to return, and it is safe to predict that in five years there will be scarcely a sail vessel left, with her ton of about four tons, or schooner that have been judged no longer fit for grain, is just as she was half a dozen years ago. This is largely from the fact that the Niagara river is not navigable for heavy draught vessels to Tonawanda, the principal lumber port on the lower lakes. The Chicago lumber fleet of small "bo-kers" are still so valuable and they, too, are not being replaced by new craft. What the future lumber carrier is to be is not yet indicated.

The following item, compiled early in November: "The month of October showed an aggregate of 255 accidents and disasters on all the lakes, 117 more than in September this year, and 115 more than in October last year. They occurred as follows: Lake Michigan, 97; Lake Huron, the Straits, and Sault River, 15; Lake Superior, 15; Georgian Bay, 13; Lake St. Clair, 15; Lake Erie and Welland canal, 15; Lake Ontario, 12. The causes were: Heavy weather, 116; loss, 821,400; stranded, 35; loss, \$108,000; ashore, 60; loss, \$229,500; spring leak, 12; loss, 20,000; disabled, 24; loss, \$3,400; collision, 18; loss, \$17,500; fire, 3; loss, \$11,000; loss on cargoes, \$51,100. Total loss for the month, \$1,005,200, an increase over September of \$235,300. Reckoning 40 lives lost with the steamer Vernon, 122 persons were drowned from vessels in October on the great lakes."

The foundering of the propeller Vernon of Manitowish, Wis., in the storm of Oct. 29 is the most serious accident of the year so far. November was less disastrous than was the month preceding it, in the aggregate. The loss of the propeller Oseola off Port Hope, Lake Huron, and the burning on Nov. 17 of the Anchor line propeller Arizona at Marquette were among the serious disasters of the month. The whole is quite too large to warrant any attempt at particularizing.

If there is any new feature of the lake trade that is interesting outside of the strict commercial line, it is the apparent revival of the passenger traffic that went out with the advent of the railways. Already steamers from Cleveland, Detroit and Chicago are doing a thriving passenger business during the warm months, and last year for the first time the Buffalo passenger line felt the movement. As the increase of wealth annually to the leisurely class those trips to the northwest or to points of interest on the way are likely to steadily increase.

C. H. T.

WHITE RUSSIAN SOAP. The only brand of Laundry Soap awarded a first class medal at the New Orleans Exposition. Guarantied absolutely pure, and for general household purposes is the very best. It became apparent that the towing vessel should be large enough to carry cargo, as well as pull a consort, so for several years the Buffalo passenger line felt the movement. As the increase of wealth annually to the leisurely class those trips to the northwest or to points of interest on the way are likely to steadily increase.

HOPWELL'S. Cures—Removes Hair, Sunburn, Bee Stings, Itch, and All Insect Bites. Humors, Rheumatism, and every form of skin disease. It is the most delicate skin medicine ever used. Price 50 cents. Hopwell's, 100 N. York St., New York.

I WANT AGENTS FOR MISSOURI STEAM WASHER. To men and women of the highest intelligence, who are capable of making a new and profitable business. The washer works on a new principle and is the best ever made. It is the only one that will clean and clothe equally well. Sample sent on two weeks' trial, on liberal terms. To be returned at \$2.00 if not satisfactory. Send for circulars, and you will be glad to give the washer works on a new principle and is the best ever made. It is the only one that will clean and clothe equally well. Sample sent on two weeks' trial, on liberal terms. To be returned at \$2.00 if not satisfactory. Send for circulars, and you will be glad to give the washer works on a new principle and is the best ever made. It is the only one that will clean and clothe equally well. Sample sent on two weeks' trial, on liberal terms. To be returned at \$2.00 if not satisfactory. Send for circulars, and you will be glad to give the washer works on a new principle and is the best ever made. It is the only one that will clean and clothe equally well. Sample sent on two weeks' trial, on liberal terms. To be returned at \$2.00 if not satisfactory. Send for circulars, and you will be glad to give the washer works on a new principle and is the best ever made. It is the only one that will clean and clothe equally well. Sample sent on two weeks' trial, on liberal terms. To be returned at \$2.00 if not satisfactory. Send for circulars, and you will be glad to give the washer works on a new principle and is the best ever made. It is the only one that will clean and clothe equally well. Sample sent on two weeks' trial, on liberal terms. To be returned at \$2.00 if not satisfactory. Send for circulars, and you will be glad to give the washer works on a new principle and is the best ever made. It is the only one that will clean and clothe equally well. Sample sent on two weeks' trial, on liberal terms. To be returned at \$2.00 if not satisfactory.
