More Navy Surgeons Needed, Washington, Oct. 23.—The strongest recommendation in the annual report of Surgeon General Van Reypen, just made public, is that relating to an increase in the medical corps of the navy. He points out that while there has been a steady increase in the en-listed force of the navy for the past two years, and while the marine corps has been swelled by the addition of 2,000 men, there has been no suitable provision made for a corresponding increase in the medical corps. He recommends that the corps be increased five surgeons and twenty assistan surgeons and that the volunteer sur geons who served in the war and are now in service be transferred to the regular rolls and the age limitation be removed In their cases.
