LONDON LETTER.
Regular Correspondence.
LONDON, ENGLAND, Sept. 20, 1880.
Another week of exceptional fine weather has brought harvest to a termination in many parts of England under very favorable circumstances, while steady progress has been made with the cutting and stacking of grain throughout Scotland and Ireland.

The weather in France throughout the past week has been very favorable for threshing, which now has become general, the cutting and gathering of the cereal crops having concluded. It is rather early to form an opinion as to the yield of wheat, but the general opinion is that the crops will fall short of an average.

At Marsailles the arrival of wheat for the week ending August 28th, were 55,000 qrs., and the stock in the docks has increased to 32,500 qrs. Business has been quiet, and prices maintained with difficulty, except for the finest sorts. The shipments from Russia have been very small and importers have warehoused, the arrivals, thence sooner than offer them at present prices.

At Dijon the wheat trade has been dull and disappointing, but rye has been in good request. At Marsailles the arrival of wheat for the week ending August 28th, were 55,000 qrs., and the stock in the docks has increased to 32,500 qrs.
