The Telephone and Good Roads

The telephone goes hand in hand with good '...

The telephone overcomes many of the obsta-cles of bad roads and makes it possible for the farmer and other rural residents to transact busi-ness in the city and with neighbors when the roads are impassable.

Progressive farmers are insisting upon good roads and telephones. These two agencies of modern civilization are doing more than all others toward eliminating the isolation of country life. You can have a telephone in your home at very small cost. Send a postal for our free booklet giving complete information.
