Editor Hall of the Petersburg Record couldn't locate a cherry tree on Washington's Birthday but he got in his work on a cherry bitters bottle with his little hatchet. Hall is always equal to the emergency at every turn of the road.

A letter received from our friend Harry H. Baker a few days ago is published in full in this issue. It is very interest- ing to us and we believe our readers will also be glad to get a glimpse of the sunny south as seen by Mr. Baker.

Our readers will notice that the PIONEER has enlarged again to a 10-page paper all printed at home except two pages. Read every page and be sure to notice the advertisements. They are fresh and new, telling of bargains

and were to go to get them.

Hoch, the bigamist and wife murderer, expiated his crime by the hemp route last Friday. Notwithstanding his many state- ments that he was not born to be hung, he took the drop on sched- ule time.

The recent insurance investi- gations have wrought havoc a- mong the leaders of insurance circles. From well fed and happy millionaires, they have been reduced to emaciated men- tal wrecks, all brought about by the exposure of the means used in amassing their great wealth. Surely the way of the trans- gressor is hard.

In this issue the PIONEER pub- lishes an article from the pen of Walter A. Masters, a young man well known here, who is attend- ing the Agricultural College at Fargo. The article tells what should be looked for in a good dairy cow; the care of the animal and what constitutes the proper balanced ration. To obtain the best results attention must be paid to details and everyone who is in the dairy business or con- templating going into the busi- ness should read the article care- fully as it is written from a scientific standpoint and should be correct if experiments cover- ing years of patient labor count for anything.

## Ivory Wood Fiber Plaster

the very best plaster on the market.

This plaster requires no sand and is already for use when you get it from us. This plaster is composed of wood fiber, which gives it flexibility, toughness, lightness and strength, and the composition is such that nails can be driven into it and withdrawn the same as in wood. It is a non-conductor of sound, electricity, heat and cold, and will make a hard smooth wall. It is a proof against damage by water, and is not injured by freezing. It finishes naturally in a beautiful white, but readily takes decorative substances, such as paints, kalsomines and fresco colors. In fact it is the very best plaster on the market.
