Lemons are used for soap in many countries where they grow. When, for instance the men and women of the West Indies want to wash their hands, they squeeze a lemon over them briskly in water until they are clean. There is an acid in the lemon similar to that used in soap. And in countries where oranges grow country gentlemen use the cheapest kind for blacking their boots.

Rocky Bar, Mountain Home and Glenn's Ferry are at outs on the county seat question, and the two papers are slinging ink at each other vigorously. The Elmore Bulletin of last Saturday says: "District Attorney McCarty returned from a visit to Boise City Tuesday. He necessarily stopped at Mountain Home a short time and says the people of that place are wild about the county seat removal; that they act as though the county seat was the only salvation of the town; that the bargain between Glenn's Ferry and Mountain Home is a positive fact, and that the people of the latter place will trade their boots and swap wives to gain a vote when the time comes. Politics will cut no figure with them. The fight is sectional and county seat the war cry."

Charles Black says the grasshoppers are bound to clean out the lower Wood River valley between Bellevue and Silver Creek. The ground is black with them, and they dont seem to be half through hatching yet. Mr. Black tried everything he could think of. For instance: he raked all he could find on a piece of ground 20 feet square into a pile, threw brush and straw on top, and set it afire. Scarcely any grasshoppers were burned; nine tenths of them getting away. He turned on all the water he could on a hay field, and covered the ground pretty well. The hoppers climbed out of the water until there were three or four on every blade of grass, looking on as if laughing at his futile efforts. Nothing can rid the country of them, he says. They must be allowed to stay their time out, which seems to be two or three years in each locality. This is the third year for the prairie and second for the valley.
