A. B. Frost, the well-known illustrator of rustic types, has just completed a series of pictures of "People We Meet in the Country" for the Ladies' Home Journal. The first of these, "Coming Home for Christmas," is published in the December number of that magazine. Others are "At the Country Store," "When the Circus Comes to Town," "At the Railroad Station," "The Town Meeting," etc. Each will be printed in full-page form and will be an interesting feature of the successive issues of the Journal.

The Boer Girl at Home.

Much has been said of the sturdy, fugal Dutch farmers of the Transvaal, but little is known of their sweethearts, wives and daughters, who have contributed so largely to the prosperity of the South African Republic. Consequently, an article on "The Boer Girl of South Africa," by the author of "Oom Paul's People," to appear in the January Ladies' Home Journal, will be interesting.

The town of Concord, or Vine-land, opposite Lewiston, is to be christened with a new name. It will be given a name that is familiar to all, as belonging to one who braved the wilds of the unknown west, and who, with his companion, Lewis blazed the way to settlement and civilization. Concord will on the first of January take the name of the fearless explorer Clark, and will be known as Clarkston.

Persuaded to come to Cottonwood. A large number of citizens have been bringing pressure to bear all summer upon Dr. Green of Grangeville to visit Cottonwood, but so far has flatly refused owing to his large practice in Grangeville where he keeps two men busy all the time. Last week some our citizens waited upon him in person, and after much persuasion succeeded in gaining his consent to make a short visit to Cottonwood this fall.

The Dr. tells us that his trip must necessarily be brief as the Grangeville populace and surrounding community demand his entire attention. We who have tried so hard to get the Dr. here will take advantage of this opportunity to show our appreciation of his favor and endeavor to force upon him the impression that Cottonwood deserves more of his time and we may be able to get him to come oftener. Perhaps when the railroad comes to Cottonwood and Grangeville becomes a suburb that we will be blessed with the Dr. and his family permanently.

EASILY DIGESTED FOOD.

Toasting bread until it becomes brown largely converts the starch into dextrin; and hence, so far as the brown portion is concerned, one of the processes of digestion is gone through before the bread is taken into the stomach. It will be found that the thinner the slices of bread, and the more thoroughly they are toasted, the easier digestion will be, and when all portions of the slice of bread are thoroughly toasted—not burned, but still changed to a deep brown color—it will be found to be still more easily digested.

Iron Tonic In Many Vegetable.

An eminent physician claims that many vegetables supply the iron that is the basis of most tonics in a much more effective form. Spinach, apples, beans, peas, strawberries, potatoes, beets and currants, all contain the mineral without the admixtures that make so many medicines harmful. Stewed black currants eaten daily through their season will cure anemia, and potatoes are a specific for scurvy.

Upon urgent request I have consented to come to Cottonwood from December 4th, to 15th, inclusive and the demands of my home office are such as to be positively unable to remain any longer. I come fully prepared to do all kinds of dental work, those desiring work done should call the first days of my visit and set dates as I have considerable work already spoken for and the first come first served.

Respectfully Dr. G. A. Green.
