"Where Quality and Prices Meet"

Just a Few Cents an Acre

A good farm implement does its work for many years at a cost of only a few cents an acre for the work done each year.

It makes farming operations easier, faster, more timely.

It decreases your cost of production.

It increases your yields per acre.

You can do without mere luxuries, and make money by doing so.

You can do without goods, the need of which is questionable, and never lose a cent by so doing.

But you lose good, hard dollars when you try to get along without any wealth-producing implement that you actually need.

We are able to buy implements this year for less than we paid last year, and we are going to give our customers the full benefit of the lower prices.

You get the same high quality for less money—many years of good service at a cost of only a few cents per acre.

We'll be glad to show you these new implements you need.
